

**Hi kids. I'm
Ergon Energy man.**

**Colour me in and I'll
help you use your
energy sense
super powers to help
save electricity
around your home.**

**There's lots of easy
things you can do like:**

- Always remembering to turn off the light when you leave a room.
- Taking shorter showers; it saves hot water.
- Turning off your game console when you've finished playing.
- Thinking about what you want from the fridge before you open the door.

**If you do these simple
things, you'll be using
your energy sense
super powers
and helping to
save the
planet.**

everything in our power
