In addition to the Directors' Report, provided here as part of the Annual Financial Statements 2009/10, a comprehensive Corporate Governance Statement has been provided within the Annual Stakeholder Report 2009/10 (p 57-70). For further information on our corporate governance, such as our policies, charter and plans, please visit www.ergon.com.au/about-us/company-information

DIRECTORS' REPORT

FOR THE YEAR ENDED 30 JUNE 2010

The directors present their report together with the financial report of Ergon Energy Corporation Limited (the Company) and of the consolidated entity, being the Company and its controlled entities (the Economic Entity) for the year ended 30 June 2010 and the auditor's report thereon.

Directors

The names and details of the directors of Ergon Energy Corporation Limited in office during the financial year and up to the date of this report are as follows:

Name, qualifications and independence status	Experience, special responsibilities and other directorships
<p>Dr Ralph Craven <i>BE PhD FIEAust FIPENZ FAICD CPEng</i> Chairman Independent Non-Executive Director</p>	<p>One of the industry's most respected and in-demand figures, Ralph Craven has a professional background which encompasses the energy and resources sector, commodity trading and regulatory complexities, bringing formidable expertise in the international energy industry to the Chairmanship.</p> <p>From 1995 until 1997, he was the CEO of the energy retailing company established to enable Ergon Energy's predecessors to enter the competitive electricity retail markets, which in 1999 was incorporated into what is Ergon Energy today. From 2003 until 2007, Dr Craven was CEO of the New Zealand Government-owned Transpower, which owns and manages the National Grid and also operates the wholesale electricity market. He was Executive Director of NRG Asia-Pacific, responsible for its investments in the Asia-Pacific region, and served Shell Coal as General Manager of its international power and energy portfolio. For a four-year period to the end of 2007, Dr Craven was Chair of d-cypha Trade Ltd, a company which has exclusive management rights to all Sydney Future Exchange energy-related futures and options products used by participants in the Australian National Electricity Market.</p> <p>Dr Craven is a board member of the International Electrotechnical Committee, which is the leading global organisation that prepares and publishes international standards for all electrical, electronic and related technologies. Dr Craven is Deputy Chairman of Arrow Energy Limited and a non-executive director of Tully Sugar Limited. He is also a director of Ergon Energy Telecommunications Pty Ltd and a member of all of Ergon Energy's Board Committees.</p>

Name, qualifications and independence status	Experience, special responsibilities and other directorships
<p>John Bird <i>FCPA FAICD FTIA FAIST</i> Deputy Chairman Independent Non-Executive Director</p>	<p>As a Registered Company Auditor, Mr Bird provides considerable experience and direction to Ergon Energy in his role as Deputy Chairman and Chairman of the Board's Audit and Financial Risk Committee, as well as Chairman of the AER 2010 Due Diligence Committee. Mr Bird is also a director of Ergon Energy Telecommunications Pty Ltd. He was formerly a Managing Partner in Brown and Bird Certified Practising Accountants in Mackay. Mr Bird is Chair of the Queensland Labor Group of Companies and of ESI Financial Services Pty Ltd and is Deputy Chairman of Electricity Supply Industry Superannuation (QLD) Ltd. He previously served as Deputy Chairman of the electricity retailer Ergon Energy Pty Ltd for a period of seven years.</p>
<p>Susan Forrester <i>EMBA BA LLB (Hons)</i> Independent Non-Executive Director</p>	<p>Originally trained as a banking and finance lawyer, Susan Forrester brings to the Board more than 20 years of commercial experience in the legal, governance and human resource areas, spanning the public and private sectors. This experience was gathered whilst in executive management roles in corporate treasury and professional services firms (legal, consulting and architecture) during which time she completed an Executive MBA with Melbourne Business School, specialising in change management and strategy. Susan is Chief Executive of The CEO Institute, a professional development forum for CEOs and business leaders, and serves as a non-executive director on the Boards of Shine Lawyers Ltd (where she serves on their Audit and Risk Committee), Gold Coast Parklands, Queensland Professional Credit Union Ltd and the Brisbane Festival Pty Ltd. Ms Forrester is also a member of Ergon Energy's People Committee.</p>
<p>Gary Humphrys <i>CA GAICD</i> Independent Non-Executive Director Appointed 1 October 2009</p>	<p>Appointed during the year under review, Gary Humphrys brings more than 30 years of experience in the energy and mining industries to the Board. A chartered accountant, he has held senior executive roles in both the private and public sectors across a range of disciplines, including finance and accounting, treasury, taxation, IT, procurement, risk management and audit. In recent years, Mr Humphrys has undertaken Board and related committee roles in the water, energy, mining and health industries and currently holds directorships with the SEQ Water Grid Manager (Chairman) and St Vincent's and Holy Spirit Health Ltd. He is a member of Ergon Energy's Audit and Financial Risk Committee, as well as the People Committee.</p>
<p>Wayne Myers <i>MAICD</i> Independent Non-Executive Director</p>	<p>Mr Myers is currently the Managing Director of Dinorden Pty Ltd – a business consulting service. He has worked in the Information Technology and Telecommunications industry for over 30 years. Mr Myers is Chairman of Logan Development Working Group and Australian Water (Queensland) Pty Ltd. Mr Myers is a member of Ergon Energy's AER 2010 Due Diligence and Operational Risk Committees and Chair of the People Committee. Mr Myers is also Chairman of Ergon Energy Telecommunications Pty Ltd.</p>

DIRECTORS' REPORT

FOR THE YEAR ENDED 30 JUNE 2010

Name, qualifications and independence status	Experience, special responsibilities and other directorships
<p>Helen Stanton <i>BE GAICD</i> Independent Non-Executive Director</p>	<p>Ingham-based engineer Helen Stanton is an independent business improvement consultant, specialising in strategy implementation, business process analysis and change management. Previously a Senior Operations Engineer and Six Sigma Leader at BHP Billiton, she has had responsibilities ranging from managing major engineering projects to coordinating business improvement and strategy development. Ms Stanton is a member of the Australian Institute of Mining and Metallurgy and Australian Institute of Company Directors. She chairs Ergon Energy's Operational Risk Committee and is a member of Ergon Energy's AER 2010 Due Diligence Committee.</p>
<p>Tony Mooney <i>BEd BA (Hons) FAICD</i> Independent Non-Executive Director Resigned 20 July 2010</p>	<p>Tony Mooney brought extensive experience in infrastructure, economic development, community engagement and regional government to Ergon Energy's Board. Mr Mooney served the Townsville City Council as an elected representative for more than 30 years. During his 19 years as Mayor, Mr Mooney oversaw a period of unprecedented sustainable urban and infrastructure development which transformed Townsville into a booming regional centre. As Mayor, he championed a partnership with Ergon Energy which helped win the bid to be part of the Australian Government's Solar Cities Program. Mr Mooney was also the Ergon Energy representative on the Board of Townsville Enterprise Limited. He also previously served on the Local Government Superannuation Board and as a director of the Port of Townsville. He was a member of Ergon Energy's Audit and Financial Risk Committee, as well as the Operational Risk Committee.</p>

The directors have been in office since the start of the financial year to the date of this report unless otherwise stated below:

Tony Mooney resigned as a director 20 July 2010.

Gary Humphrys was appointed on 1 October 2009 until 30 September 2012.

Ralph Craven and Wayne Myers have been appointed until 30 September 2011.

All other directors have been appointed until 30 September 2010.

COMPANY SECRETARY

Graeme Finlayson

BA (Hons) LLB (Hons) MBA

Graeme Finlayson commenced with Ergon Energy in the position of General Counsel and Company Secretary in 2008. Prior to this, Graeme held senior in-house commercial legal roles and worked with some of Australia's top national law firms. Graeme has also held senior executive positions and directorships with Queensland Rail and the Gold Coast City Council.

PRINCIPAL ACTIVITIES

The principal activities of the Economic Entity during the financial year consisted of the:

- Maintenance of an electricity distribution system within the State of Queensland;
- Distribution of electricity within the State of Queensland;
- Non-competitive electricity retailing in the State of Queensland; and
- Provision of electricity related contracting and other services.

DIVIDENDS

Dividends amounting to \$137.5 million (2009: \$116.6 million) have been provided for during the financial year. A final dividend of \$116.6 million was paid on 30 December 2009 in respect of the 2009 financial year. The dividend for the 2010 financial year was not paid during the year.

OPERATING AND FINANCIAL REVIEW

The consolidated income statement shows a consolidated profit after income tax equivalent expense for the Economic Entity for the year of \$166.5 million (2009: \$129.3 million).

The financial statements are a general purpose financial report that have been prepared in accordance with Australian Accounting Standards and Interpretations, requirements of the *Corporations Act 2001*, provisions of the *Government Owned Corporations Act 1993* (the "Act") and other relevant legislation issued pursuant to that Act.

SIGNIFICANT CHANGES IN THE STATE OF AFFAIRS

There were no significant changes to the state of affairs of the Economic Entity during the year.

SIGNIFICANT EVENTS AFTER BALANCE DATE

No matters or circumstances have arisen since the end of the financial year which significantly affected or may significantly affect the operations of the Economic Entity, the results of those operations or the state of affairs of the Economic Entity in future financial years.

LIKELY DEVELOPMENTS AND FUTURE RESULTS

The Economic Entity expects to continue its operations including distribution of electricity, non-competitive electricity retailing and provision of electricity related contracting and other services within the State of Queensland.

ENVIRONMENTAL REGULATION AND PERFORMANCE

The Economic Entity's environmental obligations are regulated under State and Federal laws.

The *National Greenhouse and Energy Reporting Act 2007* (NGER Act) requires the Economic Entity to report its annual greenhouse gas emissions and energy use. The first measurement period for the NGER Act ran from 1 July 2008 to 30 June 2009. The Economic Entity has implemented systems and processes for the collection and calculation of the data required, enabling it to submit its report to the Greenhouse and Energy Data Officer.

All environmental performance obligations are reported to the Operational Risk Committee and are, from time to time, subject to government agency, internal and external professional agency audits, as well as ongoing review to ensure compliance. The Economic Entity has a policy of meeting all its environmental obligations. The Economic Entity's certification to International Standard AS/ISO 14001:2004 has been maintained.

No environmental breaches have been notified to any government agencies during the financial year. There have been no major non-conformances/incidents (defined in internal policy guidelines as Class 1 or 2) reported in the financial year.

For further environmental performance information, refer to the Annual Stakeholder Report which is available separately and on the website - www.ergon.com.au

INDEMNIFICATION AND INSURANCE OF DIRECTORS AND OFFICERS

During the year, a policy was held to insure all directors and officers of the Economic Entity against liabilities incurred in their capacity as director or officer. The provisions of this policy prohibit the disclosure of the nature of the liabilities and the amount of the premium paid. The *Corporations Act 2001* does not require disclosure of this information in these circumstances.

The Company indemnifies the directors and officers of the Economic Entity. The indemnity relates to any liability (claim, action, suit, proceeding, investigation, inquiry, damage, loss, cost or expense) incurred by virtue of being a director or officer of the Economic Entity, other than: A liability owed to the Economic Entity; a liability for a pecuniary penalty or compensation order under the *Corporations Act 2001*; and a liability owed to someone other than the Company that did not arise out of conduct in good faith.

DIRECTORS' REPORT

FOR THE YEAR ENDED 30 JUNE 2010

The Company also indemnifies each director and officer against any legal costs incurred in respect of a liability incurred by virtue of being a director or officer of the Economic Entity, other than for legal costs incurred: in defending or resisting proceedings in which the director or officer could not be indemnified; in defending or resisting criminal proceedings in which the director or officer is found guilty; and in defending or resisting proceedings brought by the Australian Securities and Investments Commission (ASIC) or a liquidator for a court order.

DIRECTORS' SHAREHOLDING

No directors held any beneficial interest in the shares of the Company. All issued shares are held by the shareholding Ministers on behalf of the Queensland Government.

DIRECTORS' MEETINGS

The number of directors' meetings (including meetings of committees of directors) held during the year ended 30 June 2010 and the number of meetings attended by each director was as follows:

	Board Meetings		Audit & Financial Risk Committee		AER 2010 Due Diligence Committee		People Committee		Operational Risk Committee	
	A	B	A	B	A	B	A	B	A	B
R Craven	18	20	5	5	4	5	6	7	4	4
J Bird	18	20	5	5	5	5	-	-	-	-
S Forrester	16	20	-	-	-	-	5	7	-	-
G Humphrys	13	15	3	3	-	-	3	3	-	-
W Myers	20	20	-	-	5	5	7	7	4	4
H Stanton	20	20	-	-	5	5	-	-	4	4
T Mooney	20	20	5	5	-	-	-	-	3	4

A - Number of meetings attended

B - Number of meetings held during the time the director held office during the financial year

NON-AUDIT SERVICES

The directors are satisfied that the provision of non-audit services by the Queensland Audit Office or its delegate during the financial year ended 30 June 2010 are compatible with the general standard of independence of auditors imposed by the *Corporations Act 2001*.

AUDITOR'S INDEPENDENCE DECLARATION

The auditor's independence declaration is on page 78 and forms part of the directors' report for the year ended 30 June 2010.

ROUNDING

The Company is of a kind referred to in Class Order 98/0100 issued by ASIC, relating to the "rounding off" of amounts in the directors' report (or financial statements). Amounts in the directors' report (or financial statements) have been rounded off in accordance with that Class Order to the nearest tenth of a million dollars, or in certain cases, to the nearest thousand dollars.

Signed in accordance with a resolution of directors.

Dr R Craven

Chairman

Dated at Brisbane this 27th day of August 2010.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2010

NOTE 1: Significant accounting policies

Ergon Energy Corporation Limited (the Company) is a public company limited by shares and is domiciled in Australia. The consolidated financial statements of the Company for the year end 30 June 2010 comprises the Company and its controlled entities (collectively referred to as the Economic Entity) and the Economic Entity's interest in associates and jointly controlled entities.

The Company's registered office and its principal place of business are as follows:

Registered Office

22 Walker Street
Townsville Queensland 4810

Principal Place of Business

34-46 Dalrymple Road
Garbutt Queensland 4814

The principal activities of the Economic Entity during the financial year consisted of:

- Maintenance of a electricity distribution system within the State of Queensland;
- Distribution of electricity within the State of Queensland;
- Non-competitive electricity retailing in Queensland; and
- Provision of electricity related contracting and other services.

The financial statements were authorised for issue by the directors on 27 August 2010.

(A) Statement of compliance

The financial statements are a general purpose financial report that have been prepared in accordance with Australian Accounting Standards and Interpretations, requirements of the Corporations Act 2001, provisions of the Government Owned Corporations Act 1993 and other relevant legislation issued pursuant to that Act.

(B) Basis of preparation

The financial statements are presented in Australian dollars. The Company is of a kind referred to in Class Order 98/0100 issued by Australian Securities and Investments Commission (ASIC), relating to the "rounding off" of amounts in the financial statements. Amounts in the financial statements have been rounded off in accordance with that Class Order to the nearest tenth of a million dollars, or in certain cases, to the nearest thousand dollars.

Historical cost convention

The financial statements are prepared on the historical cost basis, except for the valuation of certain financial assets and liabilities at fair value through profit or loss and certain classes of property, plant and equipment.

Critical accounting estimates

The preparation of financial statements in accordance with Australian Accounting Standards requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Economic Entity's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 2 to the financial statements.

Consistent accounting policies

The accounting policies have been consistently applied to all years presented, unless otherwise stated.

(C) Basis of consolidation

A subsidiary is an entity over which the Company has the power to govern the financial and operating policies. This power generally accompanies a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Company controls another entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Company. All intra-group transactions, balances, income and expenses are eliminated in full on consolidation. They are de-consolidated from the date that control ceases.

The purchase method of accounting is used to account for the acquisition of subsidiaries by the Company. The cost of an acquisition is measured as the fair value of the assets given, liabilities incurred or assumed and equity instruments issued at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The excess of the cost of acquisition over the fair value of the Company's share of identifiable net assets acquired is recorded as goodwill. If the cost of the acquisition is less than the fair value of the Company's share of the net assets of the subsidiary acquired, the difference is recognised immediately in the income statement.

(D) Investments in associates

Associates are all entities over which the Company has significant influence but not control. Investments in associates are initially recognised at cost by the Economic Entity and subsequently accounted for using the equity method. The Company's investment in associates is the cost identified on acquisition net of accumulated impairment losses.

The Economic Entity's share of its associates' post-acquisition profits or losses is recognised in the income statement and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the Economic Entity's share of losses in an associate equals or exceeds its interest in the associate, the Economic Entity does not recognise any further losses unless it has incurred obligations or made payments on behalf of the associate.

Unrealised gains on transactions between the Economic Entity and its associates are eliminated to the extent of the Economic Entity's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the Economic Entity.

(E) Jointly controlled entities

The Company has an interest in one incorporated jointly controlled entity as at the end of the financial year. The equity method of accounting is applied by the Economic Entity, as described in the Economic Entity's policy on accounting for associates.

(F) Foreign currency translation

Foreign currency transactions of the Economic Entity are translated into Australian dollars, being the functional currency and presentation currency of the Economic Entity, using the exchange rates prevailing at the date of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement, except when deferred in equity as qualifying cash flow hedges.

(G) Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable and is net of returns, trade allowances and duties and taxes paid. Revenue is recognised for the major business activities as follows:

(i) Regulated network business

As a network service provider, the Company includes Distribution Use of System (DUOS) income in sales revenue. Where appropriate, DUOS income is eliminated upon consolidation.

The Company is subject to a revenue cap that can be earned on its regulated assets. The regulated return is recognised in accordance with the revenue cap.

Regulated network prices are determined and initially invoiced based on estimates. Actual revenue allowed by the Regulator may vary from that estimated, resulting in a direction by the Regulator to the Company to increase / (reduce) prices in the succeeding periods to recover / (refund) amounts under or over charged. Amounts recovered or refunded are recognised in the income statement in future periods.

(1) Regulated network revenue

Regulated network revenue and electricity sales revenue are disclosed as sales revenue.

(2) Non refundable capital contributions

Non refundable contributions of cash or non current assets are recognised as revenue (up to an amount determined by the Regulator) when the network has been extended or modified consistent with the terms of the contribution. Any amounts received in excess of the capped amount are recognised in the provision for system usage charge over-recovery. The amount of the revenue and the asset recognised for non refundable contributions of non current assets is the fair value of the contributed assets at the date on which the Economic Entity gains control of the contribution.

(iii) Electricity retail business

(1) Electricity sales revenue to franchise customers

Revenue recognised is the aggregate of invoices raised, together with the estimated metered but not invoiced energy consumption.

(2) Community Service Obligations

As part of the Queensland electricity market reforms introduced in the late 1990's, the Government made a commitment that state wide uniform retail tariffs would apply to franchise customers and that no franchise customer would be adversely affected by ongoing electricity market reforms. From the 2001/02 financial year, the Queensland Government determined that a fixed gross margin, adjusted for allowed energy costs, would apply to sales of electricity to franchise customers. Payments received primarily represent the shortfall in the margin received by the Economic Entity.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2010

NOTE 1: Significant accounting policies (continued)

(iii) Dividend revenue

Dividend revenue is recognised in the income statement on the date the entity's right to receive payment is established.

(iv) Other non-regulated revenue

Non-regulated revenue comprises revenue (net of discounts and allowances) mainly from the provision of electricity-related services. Revenue for the provision of services is recognised by reference to the stage of completion of the transaction. Revenue for the sale of goods is recognised on delivery of the goods to the customer. Interest income is recognised in the income statement as it accrues, using the effective interest rate method.

(H) Expenses

(i) Cost of sales

Cost of sales is the accumulation of costs associated with network charges (including Transmission Use of System expenses), electricity purchases and any other costs associated with the sale of electricity.

(ii) Operating lease payments

Payments made under operating leases are recognised in the income statement on a straight-line basis over the term of the lease. Lease incentives received are recognised in the income statement as an integral part of the total lease expense.

(iii) Finance lease payments

Minimum lease payments are apportioned between the finance charge and the reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability. The interest expense component of finance lease payments is recognised in the income statement using the effective interest rate method.

(iv) Finance and related costs

Finance costs are recognised as expenses in the period in which they are incurred except where borrowings have been taken to fund a qualifying constructed asset, in which case the expense is capitalised into the carrying value of the asset.

(I) Income taxes

(i) Tax equivalents

The Economic Entity is liable to make tax equivalent payments on its taxable income to the Queensland Government. Any taxation payments that it is required to make will be made pursuant to Section 155(4) of the *Government Owned Corporations Act 1993*. To date, the Economic Entity has not made any tax payments since its inception because of its tax loss profile.

The Economic Entity's tax liability is administered by the Australian Taxation Office (ATO) under the National Tax Equivalent Regime (NTER). The NTER broadly utilises the provisions of the *Income Tax Assessment Act 1936*, the *Income Tax Assessment Act 1997* and associated legislation, the NTER Manual as well as Rulings and other pronouncements by the ATO, in order to determine the tax payable by the Economic Entity (refer Note 5).

The Economic Entity is not required to maintain a franking account.

(ii) Current tax payable

Current tax is the expected tax payable on the taxable income for the year using tax rates enacted or substantively enacted at the end of the financial year and any adjustment to tax payable in respect of previous years.

Current tax payable is recognised as current tax expense except to the extent that it relates to items recognised directly in equity, in which case that portion is recognised directly in equity.

(iii) Deferred tax equivalent assets and liabilities

Deferred tax equivalent assets and liabilities are deductible or taxable temporary differences and unused tax losses and tax credits, which are recognised using the tax rates enacted or substantively enacted at the reporting date.

Temporary differences are differences between the carrying amount of an asset and liability for financial reporting purposes and their tax bases. Tax bases are determined based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities.

Deferred tax is not recognised for the following temporary differences:

- the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit;
- Differences relating to investments in subsidiaries and jointly controlled entities to the extent that the Economic Entity is able to control the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- Differences arising on the initial recognition of goodwill.

Deferred tax equivalent assets are recognised only to the extent that it is probable that future taxable amounts will be available against which the asset can be utilised.

Movements in deferred tax equivalent assets and liabilities balances are recognised as deferred tax equivalent expenses, except to the extent they relate to:

- Items recognised directly in equity, in which case that portion is recognised in equity; and
- Acquisitions of entities or operations, in which case that portion is recognised in goodwill.

Deferred tax equivalent assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, where they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

(iv) Income tax equivalent expense

Income tax equivalent expense for the reporting period consists of current tax expense and deferred tax expense.

(v) Tax consolidation

The Company and its wholly-owned Australian resident subsidiaries formed a tax-consolidated group with effect from 1 July 2002 and are therefore taxed as a single entity. The head entity within the tax consolidated group is Ergon Energy Corporation Limited.

Current tax expense/income, deferred tax equivalent liabilities and deferred tax equivalent assets arising from temporary differences of the members of the tax-consolidated group are recognised in the separate financial statements of the members of the tax-consolidated group using the group allocation approach based on the allocation specified in the tax funding agreement.

The tax funding agreement requires a notional current and deferred tax equivalents calculation for each entity as if it were a taxpayer in its own right, except that distributions made and received arising within the tax-consolidated group are treated as having no tax consequences.

Any current tax liabilities/assets and deferred tax equivalent assets arising from unused tax losses and tax credits assumed by the head entity from the subsidiaries in the tax-consolidated group are recognised by the Company in conjunction with any tax funding arrangement amounts (refer below). Any difference between these amounts is recognised by the Company as an equity contribution to or distribution from the subsidiary.

The Company recognises deferred tax assets arising from unused tax losses and tax credits of the members of the tax-consolidated group to the extent that it is probable that future taxable profits of the tax-consolidated group will be available against which the asset can be utilised.

Any subsequent period adjustments to deferred tax assets arising from unused tax losses and tax credits assumed from subsidiaries are recognised by the head entity only.

(vi) Nature of funding arrangements and tax sharing agreements

The members of the tax-consolidated group have entered into a tax funding arrangement which sets out the funding obligations of members of the tax-consolidated group in respect of tax amounts. The tax funding arrangements require payments to/from the head entity equal to the current tax liability/(asset) assumed by the head entity. Any tax loss or tax credit deferred tax equivalent asset assumed by the head entity, results in the recognition of an inter-entity receivable/(payable) in the separate financial statements of the members of the tax-consolidated group equal in amount to the tax liability/(asset) assumed. The inter-entity receivable/(payable) is at call.

The head entity recognises the assumed current tax amounts as current tax liabilities/(assets), adding to its own current tax amounts, since they are also due to or from the same taxation authority. The current tax liabilities/(assets) are equivalent to the tax balances generated by external transactions entered into by the tax-consolidated group.

Contributions to fund the current tax liabilities are payable as per the tax funding arrangement and reflect the timing of the head entity's obligation to make payments for tax liabilities to the relevant tax authorities.

The members of the tax-consolidated group have also entered into a tax sharing agreement. The tax sharing agreement provides for the determination of the allocation of income tax liabilities between the entities should the head entity default on its tax payment obligations. No amounts have been recognised in the financial statements in respect of this agreement as payment of any amounts under the tax sharing agreement is considered remote.

(J) Cash

Cash and cash equivalents comprise cash balances and investments in money market instruments. Bank overdrafts in the form of working capital facilities are included as a component of cash and cash equivalents for the purpose of the statement of cash flows. They are highly liquid, subject to an insignificant risk of change in value and have a maturity of three months or less at date of acquisition.

(K) Borrowings and receivables

(i) Trade and other receivables

Trade and other receivables are measured at amortised cost less provision for impaired receivables.

The recoverability of trade and other receivables is reviewed on an ongoing basis. A provision for impaired receivables is established when there is objective evidence that the Economic Entity will not be able to collect all amounts due according to the original terms of receivables and hence the receivables are impaired. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation and default or delinquency in payments are considered indicators that the trade receivable is impaired. The recoverable amount is discounted at the effective interest rate. Cash flows relating to short-term receivables are not discounted if the effect of discounting is immaterial. The movement in the provision is recognised in the income statement.

(ii) Borrowings

Borrowings are initially recognised at fair value net of transaction costs incurred. Interest-bearing borrowings are subsequently measured on an amortised cost basis with any difference between cost and redemption value being recognised in the income statement over the period of the borrowings on an effective interest basis.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2010

NOTE 1: Significant accounting policies (continued)

(L) Inventories

Inventories disclosed as current assets of the Economic Entity are used in the maintenance and construction of electricity supply system assets and are not for resale. Inventories that will not be available for use within 12 months of reporting date are disclosed as non-current inventory.

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted average cost method. Net realisable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses.

(M) Energy certificates

Renewable energy certificates (RECs) on hand are measured at fair value at the end of the financial year, adjusted for known market forces with changes in fair value recognised in the income statement. RECs are disclosed in the financial statements as other assets. RECs are valued using a combination of data sources including trades executed by the Economic Entity, the Sydney Futures Exchange (SFE), ICAP and other market intelligence. The Economic Entity has sufficient market information to reliably measure the value of these certificates in accordance with the requirements of Australian Accounting Standards.

RECs used solely to satisfy retail sales commitments and surrender obligations are measured at cost. They are disclosed in the financial statements as other assets.

Gas electricity certificates on hand (including forward purchase agreements) are acquired for the Economic Entity's acquittal purposes and are measured at cost. They are disclosed in the financial statements as other assets.

(N) Property, plant and equipment

(i) Recognition and measurement

All regulated assets are measured at fair value less any subsequent depreciation. Items included in this category are regulated electricity supply system and other regulated plant and equipment.

Fair value is defined as the amount for which an asset could be exchanged between knowledgeable, willing parties in an arm's length transaction. Valuations are undertaken annually to ensure that the carrying value of the asset does not differ materially from that which would be determined using fair value at the reporting date.

Fair value is determined on the basis of an income approach using discounted future cash flows. The fair value of regulated assets was determined at 30 June 2010 utilising key assumptions that are considered reflective of those that market participants would use in valuing such assets. The income approach was used as there was no market based evidence of fair value due to the specialised nature of the regulated assets, and the items are rarely sold, except as part of a continuing business.

All other items of property, plant and equipment are measured at fair value. Non-regulated power station assets comprising isolated generation and distribution systems were subject to an independent valuation as at 31 March 2007 undertaken by Sinclair Knight Merz Pty Ltd using the Depreciated Optimised Replacement Cost methodology. In subsequent years, the isolated generation and distribution systems have been revalued based on a weighted average of indices which estimate the change in cost of replacing those assets.

The cost of property, plant and equipment constructed by the Economic Entity includes the cost of materials, direct labour and other associated costs and, where appropriate, borrowing costs. If payment for an item of property, plant and equipment is deferred beyond normal credit terms, the difference between the cash price equivalent at the date of recognition and the total payment is recognised as interest over the period of credit.

Revaluation increments are credited directly to the asset revaluation reserve, except that, to the extent that an increment reverses a revaluation decrement in respect of that class of asset previously recognised as an expense in net profit or loss, the increment is recognised immediately as income in net profit or loss.

Revaluation decrements are recognised immediately in the income statement, except that, to the extent that a credit balance exists in the asset revaluation reserve in respect of the same asset, they are debited directly to the asset revaluation reserve.

(ii) Depreciation

Depreciation is calculated on the straight line basis by reference to the useful life of each item of property, plant and equipment, other than freehold land and easements which are not depreciated. An assessment of useful lives is performed annually. Major spare parts and standby equipment purchased specifically for particular plant are capitalised and depreciated on the same basis as the plant to which they relate.

Major depreciation periods are:

	Measurement basis	Depreciation period
Supply systems	Fair value	7 to 60 years
Power stations	Fair value	5 to 40 years
Buildings	Fair value	40 years
Other plant and equipment	Fair value ⁽¹⁾	3 to 40 years

⁽¹⁾ Other plant and equipment of the Company is at fair value. The subsidiaries' property, plant and equipment are measured at cost which is considered to be a reasonable estimation of fair value.

(iii) Acquisition of assets

The purchase method of accounting is used for all acquisitions of assets. Cost is measured as the fair value of the assets given up or liabilities undertaken at the date of the acquisition plus incidental costs directly attributable to the acquisition.

(iv) Disposal of items of property, plant and equipment

The gains and losses on disposal of items of property, plant and equipment are determined by comparing the proceeds of disposals with the carrying amounts of the items. Revaluation amounts on both the asset base and the accumulated depreciation are reversed on disposal. The net gains and losses on disposals are included in the income statement.

(v) Maintenance and repairs

Maintenance costs are charged as an expense as incurred. Other routine repair and minor renewal costs are also charged as expenses as incurred.

(O) Intangible assets

(i) Research and development

Expenditure on research activities, undertaken with the prospect of gaining new technical knowledge or understanding is recognised in the income statement when incurred.

Expenditure on development activities, whereby research findings are applied to a plan or design for the production of a new or substantially improved product and process, is capitalised if the product or process is technically and commercially feasible, the Economic Entity has sufficient resources to complete development and it can reliably measure the expenditure attributable to the intangible asset during its development.

(ii) Licences

Licences that have a finite useful life are measured at cost less accumulated amortisation on a consumed basis. Licences that have infinite useful life are carried at cost less accumulated impairment losses and are subject to impairment review on an annual basis or more frequently if events or changes in circumstances indicate that it might be impaired.

(iii) Software

Software is carried at historical cost less accumulated amortisation and accumulated impairment losses.

(iv) Other internally generated intangible assets

Internally generated intangible assets are carried at historical cost less accumulated amortisation and accumulated impairment losses. All costs directly attributable to the creation of the asset from the point when it first meets the recognition criteria are capitalised into the value of the asset.

(v) Amortisation

The cost of intangible assets is amortised on a straight-line basis over the estimated useful life of the assets unless such assets have indefinite useful lives. Major amortisation periods are:

	Measurement basis	Amortisation period
Software	Cost	2 to 10 years
Licences	Cost	1 to 10 years
Customer contracts and relationships	Cost	3 to 10 years

(P) Impairment of assets

Assets that have an indefinite useful life are not subject to depreciation or amortisation and are tested annually for impairment or more frequently if events or changes indicate that they might be impaired.

All assets which are depreciated or amortised are reviewed for events or changes in circumstances that may indicate that the carrying amount may not be recoverable. If any such indication exists, the recoverable amount of the asset is estimated to determine the extent of the impairment loss. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash generating units).

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimated future cash flows have not been adjusted.

An impairment loss is recognised for the amount by which the carrying amount of the asset (or cash generating unit) exceeds its recoverable amount. An impairment loss is recognised immediately in the income statement, unless the relevant asset is carried at revalued amount, in which case the impairment loss is treated as a revaluation decrease. When an impairment loss subsequently reverses, the carrying amount of the asset (cash generating unit) is increased to the revised estimate of the recoverable amount, but only to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (cash generating unit) in prior years. A reversal of an impairment loss is recognised immediately in the income statement, unless the relevant asset is carried at fair value, in which case the reversal is treated as a revaluation increase.

(Q) Non-current assets held for sale and discontinued operations

Non-current assets and disposal groups are classified as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. This condition is met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2010

NOTE 1: Significant accounting policies (continued)

Non-current assets held for sale are stated at the lower of carrying amount and fair value less costs to sell. An impairment loss is recognised for the write-down of an asset to fair value less costs to sell.

An operation is classified as a discontinued operation when it has been disposed of or meets the criteria to be classified as held for sale and it represents a major line of business or geographical area of operations, is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations or is a subsidiary acquired exclusively for resale.

(R) Trade and other payables

(i) Trade payables, other payables and accruals

Trade payables, other payables and accruals are recognised as a liability when the Economic Entity has a legal obligation to pay cash. Such liabilities are initially recognised at fair value and subsequently measured at amortised cost.

(ii) Dividends payable

A liability for dividends payable is recognised in the reporting period in which the dividends are declared for the entire undistributed amount.

(S) Employee benefits

(i) Wages and salaries, annual leave, long service leave and sick leave

Liabilities for wages and salaries, including non-monetary benefits, annual leave, long service leave and accumulating sick leave expected to be settled within 12 months of the reporting date are recognised in respect of employees' services up to the reporting date and are measured at the amounts expected to be paid when the liabilities are settled. Liabilities expected to be settled more than 12 months after the reporting date are measured at the present value of expected future payments to be made in respect of services provided by employees up to the reporting date.

For long service leave, consideration is also given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments relating to such liabilities are discounted using market yields at the reporting date on Commonwealth government bonds with terms to maturity and currency that match, as closely as possible, to the estimated future cash outflows.

Liabilities for non-accumulating sick leave are recognised when the leave is taken and measured at the rates paid or payable.

(ii) On-costs and superannuation contributions on leave balances

On-costs, including payroll tax and workers' compensation insurance, are recognised and included in liabilities and costs when the employee benefits to which they relate are recognised as liabilities.

On-costs are measured at their nominal amounts unless the effect of the time value of money is material. If the effect of the time value of money is material, the on-costs are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the reporting date. The discount rate used to determine the present value reflects current market assessments of the time value of money and the risks specific to the liability.

On-costs are not employee benefits and are excluded from employee benefits expense. Provisions for on-costs are disclosed in the financial statements as other provisions.

Superannuation contributions relating to leave balances are measured at the present value of expected future payments to be made in respect of services provided by employees up to the reporting date. Superannuation contributions are disclosed as employee benefit expenses and as employee benefit liabilities.

(iii) Superannuation

The Company contributes to both defined contribution and defined benefit superannuation plans.

A defined contribution plan is a superannuation plan under which the Company pays fixed contributions. The Company has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods. The contributions are recognised as an employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in future payments is available.

A defined benefit plan is a superannuation plan that defines the amount of the benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and final salary. The asset or liability recognised in the statement of financial position in respect of defined benefit superannuation plans is the difference between the present value of the defined benefit obligation at the reporting date and the fair value of the plan assets, together with adjustments for past service costs.

The defined benefit obligation is calculated annually by an independent actuary using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates on Commonwealth government bonds that are denominated in the currency in which the benefits will be paid, being Australian dollars and that have terms to maturity that approximate the terms of the related superannuation liability. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in equity under the direct to equity approach.

(T) Provisions

Provisions are recognised when there is a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognised for future operating losses.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the reporting date. The discount rate used to determine the present value reflects current market assessments of the time value of money and the risks specific to the liability. Where material, the increase in the provision due to the passage of time is recognised as interest expense.

(i) Onerous contracts

A provision for onerous contracts is recognised when the expected benefits to be derived from a contract are lower than the unavoidable costs of meeting the obligations under the contract.

(ii) Restoration and rehabilitation

A provision for restoration and rehabilitation is recognised when there is a present obligation as a result of activities undertaken, it is probable that an outflow of economic benefits will be required to settle the obligation and the amount of the provision can be measured reliably. The estimated future obligations include the costs of restoring the affected area.

(U) Share capital

Ordinary shares are classified as equity.

(V) Lease commitments

(i) Operating leases

Leases in which substantially all of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments under operating leases are charged to the income statement on a straight-line basis over the period of the lease unless an alternative basis is more representative of the time pattern of benefits to be obtained from the leased property.

(ii) Finance leases

Leases in which substantially all of the risks and rewards of ownership are transferred to the lessee are classified as finance leases. A finance lease asset and a finance lease liability are recorded on the statement of financial position. The lease asset and the lease liability are established at the fair value of the asset or, if lower, at the present value of minimum lease payments. Lease payments are allocated between the finance charge and the reduction of the outstanding liability over the life of the lease.

(iii) Lease incentives

Where an entity in the Economic Entity is a lessee under an operating lease, the aggregate benefit of any incentive provided by the lessor for a new or renewed lease is recognised as an adjustment to rent expense over the lease term of the lease on a straight-line basis unless another systematic basis is more representative of the time pattern of benefit from the use of the leased asset.

(W) Contingent assets and liabilities

Contingent assets are not recognised in the financial statements. Other than when required on acquisition of a business, contingent liabilities are not recognised in the financial statements. They are, however, disclosed in the notes to the financial statements, where appropriate.

(X) Government grants

Government grants are recognised at their fair value when there is reasonable assurance that the grant will be received and the Economic Entity will comply with all attached conditions. Government grants relating to costs are deferred and recognised in the income statement over the period necessary to match the grants with the costs that they are intended to compensate. Government grants relating to the purchase of property, plant and equipment are included in non-current liabilities as deferred income and are credited to the income statement on a straight-line basis over the expected lives of the related assets.

(Y) Derivative financial instruments

(i) Hedge accounting

The Economic Entity used derivative instruments to hedge foreign exchange and interest rate exposures arising from its activities. In accordance with treasury policy, hedge accounting is applied where a designated hedge relationship exists.

Where the derivative financial instrument is designated as a hedge of the variability in cash flows of a recognised asset or liability, or a highly probable forecast transaction, the effective part of any gain or loss on a derivative financial instrument is recognised direct in equity as a reserve.

When the forecast transaction subsequently results in the recognition of a non-financial asset or liability, or the forecast transaction of a non-financial asset or liability, the associated cumulative gain or loss is removed from equity and included in the initial cost of the associated asset or liability.

If a hedge of a forecasted transaction subsequently results in the recognition of a financial asset or liability, such as a debt instrument, the associated gains or losses that were recognised directly in equity are reclassified into the income statement in the same period during which the asset acquired or assumed affects the income statement.

For cash flow hedges other than those noted above, associated cumulative gains or losses are removed from equity and recognised in the income statement in the same period during which the hedged forecast transaction affects the income statement. The ineffective part of any gain or loss is recognised immediately in the income statement.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2010

NOTE 1: Significant accounting policies (continued)

Where the hedging instrument expires or is sold, terminated or exercised, or the Economic Entity revokes designation of the hedge relationship, but the hedged forecast transaction is still expected to occur, the cumulative gain or loss at that point remains in equity and is recognised in accordance with the above policy when the transaction occurs. If the hedge transaction is no longer expected to occur, the cumulative unrealised gain or loss is transferred from equity immediately to the income statement.

(ii) Fair value accounting through the profit and loss

Derivatives are recognised at fair value at the date that a derivative contract is entered into (trade date) and is subsequently measured at fair value at each reporting date. A positive revaluation amount is reported as an asset and a negative revaluation amount is reported as a liability. The resulting gain or loss is recognised in the income statement immediately.

The following transactions are classified as derivative financial instruments and measured at fair value through the profit and loss.

(1) Derivative financial instruments held or issued for hedging franchise load

Derivative financial instruments held or issued for hedging franchise load are recorded at their fair value. The contracts are valued using a combination of data sources including current trades executed by the Economic Entity, the SFE, ICAP and other market intelligence. The Economic Entity trades frequently in these instruments and has sufficient market information to reliably measure the value of these contracts in accordance with the requirements of Australian Accounting Standards.

(2) Power purchase agreements (PPAs)

PPAs are agreements for the sale and purchase of the energy exported from a generator and of RECs and other green certificates associated with the generation of energy. PPAs held for trading purposes represent derivative financial instruments that are measured at fair value through the profit and loss.

PPAs are valued using a combination of data sources including trades executed by the Economic Entity, the SFE, ICAP and other market intelligence. The Economic Entity has sufficient market information to reliably measure the value of these agreements in accordance with the requirements of Australian Accounting Standards.

(3) Long-term Energy Procurement (LEP) Agreement

The LEP Agreement is a component of the Community Service Obligation (CSO) and Energy Procurement Deed (Deed). Its purpose relates to the management of the risk exposure from electricity price volatility experienced by the Economic Entity on franchise load. The counterparty to the Deed is the State of Queensland and the Deed was initially due to expire on 31 December 2007. Since this date, the Economic Entity has been maintaining the existing terms based on a formal

exchange of letters with the Queensland Government agreeing to the extension of the Deed, including the framework already established as part of the existing LEP Agreement. The LEP Agreement consists of a tiered pricing structure with a cap and floor provision. The LEP Agreement represents a derivative financial instrument that is measured at fair value through the profit and loss.

Fair value is determined using a combination of data sources including the Deed, trades executed by the Economic Entity, the SFE, ICAP and other market intelligence.

(4) Embedded derivatives

Derivatives embedded in other financial instruments or other host contracts are treated as separate derivatives when their risks and characteristics are not closely related to those of host contracts and the host contracts are not measured at fair value with changes in fair value recognised in profit or loss. Where the embedded derivative cannot be measured separately from the host contract, the entire contract is measured at fair value through profit and loss.

(Z) Power purchase agreements

PPAs that are entered into for the Economic Entity's own use are not considered to be financial instruments and are therefore accrual accounted.

(AA) Goods and services tax

Revenues, expenses and assets are recognised net of the amount of goods and services tax (GST), except where the amount of GST incurred is not recoverable from the ATO. In these circumstances, the GST is recognised as part of the cost of acquisition of the asset or the expense.

Receivables and payables are stated with the amount of GST included. The net amount of GST recoverable from, or payable to, the ATO is included as a current asset or liability in the statement of financial position.

Cash flows are included in the statement of cash flows on a gross basis. The GST components of cash flows arising from investing and financing activities which are recoverable from, or payable to, the ATO are classified as operating cash flows.

Commitments are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

(AB) Other owners' contributions

Where assets are transferred between entities of the wholly-owned group or State of Queensland controlled entities, under the directive of the owner (being the State of Queensland) and the consideration paid is not equal to the value recognised on the transferred assets, the difference is recognised as other owners' contributions.

(AC) Standards and interpretation issued not yet effective

The Australian Accounting Standards Board (AASB) has published certain new accounting standards and interpretations in the current year. The Economic Entity has adopted all of the new and revised standards and interpretations that are relevant to its operations and effective for the current reporting period. The adoption of these new and revised standards and interpretations does not have a material impact on the result or disclosure of the Economic Entity in the current reporting period.

The AASB has also published certain new accounting standards and interpretations that are not mandatory for 30 June 2010 reporting periods and which the Economic Entity has not early adopted. The Economic Entity's assessment of the initial impact of the following standards and interpretations either do not apply to the Economic Entity or are not expected to have an impact on the financial report of the Economic Entity:

Standard / Interpretation	Effective for annual reporting periods beginning on or after	Expected to be initially applied to the financial year ending
AASB 2009-5 <i>Amendments to Australian Accounting Standards arising from the Annual Improvements Project [AASB 5, 8, 101, 107, 117, 118, 136 & 139]</i>	1 January 2010	30 June 2011
AASB 2009-8 <i>Amendments to Australian Accounting Standards – Group Cash-Settled Share based Payment Transactions [AASB 2]</i>	1 January 2010	30 June 2011
AASB 2009-10 <i>Amendments to Australian Accounting Standards – Classification of Rights Issues [AASB 132]</i>	1 February 2010	30 June 2011
AASB 9 <i>Financial Instruments and</i>	1 January 2013	30 June 2014
AASB 2009-11 <i>Amendments to Australian Accounting Standards arising from AASB 9</i>		
Revised AASB 124 <i>Related Party Disclosures and</i>	1 January 2011	30 June 2012
AASB 2009-12 <i>Amendments to Australian Accounting Standards</i>		
AASB Interpretation 19 <i>Extinguishing financial liabilities with equity instruments and</i>	1 July 2010	30 June 2011
AASB 2009-13 <i>Amendments to Australian Accounting Standards arising from Interpretation 19</i>		
AASB 2009-14 <i>Amendments to Australian Interpretation – Prepayments of a Minimum Funding Requirement</i>	1 January 2011	30 June 2012
AASB 2010-2 <i>Amendments to Accounting Standards arising from reduced disclosure requirements</i>	1 July 2013	30 June 2014

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2010

NOTE 2: Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that may have a financial impact on the entity and that are believed to be reasonable under the circumstances.

(A) Critical accounting estimates and assumptions

The Economic Entity makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

(i) *Defined benefit superannuation fund obligations*

Various actuarial assumptions are utilised in the determination of the Economic Entity's defined benefit superannuation fund obligations. These assumptions are discussed in Note 16.

(ii) *Electricity financial instruments measured at fair value*

The Economic Entity enters into electricity financial instruments. The Economic Entity determines the fair value of these financial instruments, which includes swaps, options, swaptions, PPAs and LEP using market based valuation methods. It has taken into account the conditions existing at balance date and has used its judgment in the following areas:

- Future price and volume estimation using in-house and off-the-shelf valuation models; and
- Discounting for time value of money.

(iii) *Renewable energy certificates*

Like financial instruments measured at fair value, RECs held for trading are measured at fair value. The Economic Entity determines the fair value of these certificates using market based valuation methods as outlined in Note 1. It has taken into account the conditions existing at balance date and has used its judgment in determining the fair value.

RECs used solely to satisfy retail sales commitments and surrender obligations are measured at cost.

(iv) *Supply system asset valuation*

The Economic Entity's supply system assets are carried at fair value. Due to the absence of a binding sale agreement or active market, fair value is estimated using an income approach based on a number of key estimates and assumptions, which are outlined in Note 11.

(B) Critical judgements in applying the Economic Entity's accounting policy

The Economic Entity has made critical judgements in applying the Economic Entity's accounting policies. Listed below are the areas where critical judgement has been applied.

(i) *Employee benefits*

Management has applied judgement in determining the following key assumptions used in calculating long service leave at balance date:

- Future increases in wages and salaries;
- Employee departures; and
- Periods of service.

(ii) *Impairment of trade receivables*

The Economic Entity recognises a provision for impaired receivables in accordance with the requirements with AASB 139 *Financial Instruments: Recognition and Measurement*. In some cases, due to the high volume, low value of such trade receivables, management has exercised judgement in determining the provision for impaired trade receivables based on evidence of significant financial difficulties of the debtor and probability that the debtor will enter bankruptcy or financial reorganisation and default or delinquency. In addition to these indicators, the Economic Entity considers evidence of the trends of bad debts experienced within certain levels of aged receivables.

Loans to jointly controlled entities	59.5	68.5	59.5	68.5
Total non-current trade and other receivables	59.8	68.9	59.8	68.9

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2010

NOTE 7: Trade and other receivables (continued)

(A) IMPAIRED TRADE RECEIVABLES

An allowance has been made for estimated irrecoverable trade receivable amounts arising from past sales. This has been determined by reference to past default experience and other relevant evidence such as significant financial difficulties of the debtor, the probability that the debtor will enter bankruptcy or financial reorganisation and payment default or delinquency.

	Gross 2010	Impairment 2010	Gross 2009	Impairment 2009
	\$M	\$M	\$M	\$M
CONSOLIDATED – AGEING OF IMPAIRED RECEIVABLES				
Less than one month overdue	23.1	1.7	24.3	1.5
One to two months overdue	5.0	1.9	3.8	1.2
Two to three months overdue	1.7	1.1	2.1	1.2
Over three months overdue	5.7	5.4	6.0	5.7
	35.5	10.1	36.2	9.6

THE COMPANY – AGEING OF IMPAIRED RECEIVABLES				
Less than one month overdue	0.4	-	5.4	0.1
One to two months overdue	0.3	-	0.9	-
Two to three months overdue	0.2	-	0.5	0.1
Over three months overdue	0.6	0.6	1.7	1.6
	1.5	0.6	8.5	1.8

	Consolidated		The Company	
	2010	2009	2010	2009
	\$M	\$M	\$M	\$M
Movements in the provision for impairment of receivables are as follows:				
Carrying amount at the beginning of the financial year	9.6	4.2	1.8	2.2
Provision for impairment recognised during the financial year	6.5	11.6	0.3	2.5
Receivables written off during the financial year as uncollectible	(4.8)	(3.6)	(0.3)	(0.4)
Unused provision reversed	(1.2)	(2.6)	(1.2)	(2.5)
Carrying amount at the end of the financial year	10.1	9.6	0.6	1.8

The recognition and reversal of the provision for impaired receivables is included in "Depreciation, amortisation and impairments" in the income statements. Amounts charged to the allowance account are generally written off when there is no expectation of recovery.

(B) PAST DUE BUT NOT IMPAIRED

As at 30 June 2010, trade receivables of \$nil (2009 - \$0.4 million) of the Economic Entity and trade receivables of \$nil (2009 - \$0.4 million) of the Company were past due but not impaired. These debtors have not been provided for as there has not been a significant change in credit quality and the amounts are still considered recoverable.

The ageing analysis of these receivables is as follows:

Less than one month overdue	-	0.3	-	0.3
One to two months overdue	-	0.1	-	0.1
Two to three months overdue	-	-	-	-
Over three months overdue	-	-	-	-
	-	0.4	-	0.4

The other classes within trade and other receivables do not contain impaired assets and are not past due.

Based on the credit history of these other classes, it is expected that these amounts will be received when due.

(C) FOREIGN EXCHANGE AND INTEREST RATE RISK

Information about the Economic Entity's and the Company's exposure to foreign currency risk and interest rate risk in relation to trade and other receivables is provided in Note 22.

(D) FAIR VALUE AND CREDIT RISK

Components of the CSO receivable have been discounted to reflect the time value of money.

Due to the short-term nature of the remaining current receivables, their carrying amount approximates their fair value.

The fair value of non-current receivables is considered in Note 22. Refer to Note 22 for more information on the risk management policy of the Economic Entity and the credit quality of its trade receivables.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2010

NOTE 8: Inventories

	Consolidated		The Company	
	2010	2009	2010	2009
	\$M	\$M	\$M	\$M
CURRENT				
Maintenance and construction stock, at net realisable value	95.7	103.5	95.7	103.5
Total current inventories	95.7	103.5	95.7	103.5
NON-CURRENT				
Inventories	1.5	1.4	1.5	1.4
Total non-current inventories	1.5	1.4	1.5	1.4

Inventories recognised as an expense during the financial year amounted to \$49.6 million (2009: \$55.9 million) for the Economic Entity and the Company.

Write-downs of inventories to net realisable value recognised as an expense during the financial year amounted to \$0.5 million (2009: \$1.4 million). The expense has been included in materials and services in the income statement.

Total property, plant and equipment	7,495.0	6,900.6	7,495.0	6,899.2

VALUATION OF THE COMPANY'S REGULATED ASSETS

The regulated property, plant and equipment is carried at fair value. An income based valuation was undertaken by the Company as at 30 June 2010 using the following key assumptions:

- The regulated assets are subject to a revenue cap and it is assumed that they will continue to be subject to regulation under the Australian Energy Regulator (AER) rules in the future.
- Cash flows have been projected based on forecasts of prudent and efficient operating costs and revenue consistent with:
 - The AER Final Determination for the regulatory control period 1 July 2010 to 30 June 2015;
 - The methodology outlined in the National Electricity Rules; and
 - The AER's Statement of Regulatory Intent on the Revised WACC Parameters (Distribution) for the regulatory control period July 2010 to June 2015.
- Revenue cash flows for the 2010-2015 regulatory control period assume a rate of return of 9.72%.
- Post tax cash flows have been projected over a five year term consistent with the AER's approach. Under this approach, the tax deductibility of debt, capital raising costs and imputation credits are reflected in the projected cash flows, rather than the discount rate. The projected cash flows have been discounted at a rate of 9.72%.
- Future capital expenditure and related revenues have been excluded from the cash flows. The Company has assumed that the regulatory allowance for the maintenance component of operating expenditure is sufficient to maintain and operate the regulated assets until the end of their useful lives.
- The residual values of the regulated assets at 30 June 2015 have been determined using the best information available to estimate future cash flows. The Company has assumed that the regulator will reflect any material changes in market conditions in its determination of revenue for future regulatory periods.

The Company's regulated assets are disclosed in the following categories:

Supply systems (at directors' valuation)	6,005.7	5,446.2	6,005.7	5,446.2
Land (at directors' valuation)	151.9	109.0	151.9	109.0

(A) QUEENSLAND TREASURY CORPORATION LOANS

The market value of Queensland Treasury Corporation (QTC) loans at 30 June 2010 was \$4,130.5 million (2009: \$3,807.1 million). The market value of the QTC loan is the price that the bonds could be bought for at balance date as advised by the QTC.

(B) CUSTOMER AND OTHER REPAYABLE DEPOSITS

Customer and other repayable deposits include security deposits received by the Economic Entity in relation to electricity supply to certain customers. Interest is paid on the deposits and credited to the customers account annually.

(C) FINANCE LEASE LIABILITIES

Information about the Economic Entity's and the Company's lease commitments is provided in Note 24.

(D) FINANCING ARRANGEMENTS

The Economic Entity has access to the following lines of credit:

Working capital facility

Facility not utilised at the end of the financial year	300.0	300.0	150.0	150.0
Total facility available	300.0	300.0	150.0	150.0

(E) INTEREST RATE AND LIQUIDITY RISK

Information about the Economic Entity's and the Company's exposure to interest rate risk and liquidity risk is provided in Note 22.

NOTE 16: Employee benefits

	Consolidated		The Company	
	2010	2009	2010	2009
	\$M	\$M	\$M	\$M
CURRENT LIABILITIES				
Employee benefits	138.3	132.4	138.3	132.4
Total current employee benefits liability	138.3	132.4	138.3	132.4
NON-CURRENT LIABILITIES				
Employment benefits	13.2	10.1	13.2	10.1
Retirement benefit liability	40.6	68.8	40.6	68.8
Total non-current employee benefits liability	53.8	78.9	53.8	78.9

The current provision for employee benefits for the Economic Entity and the Company includes \$72.6 million of annual leave, vested long service leave and on-cost entitlements accrued but not expected to be taken within 12 months (2009: \$85.3 million).

EMPLOYEES RECEIVING PERFORMANCE PAYMENTS				
Financial year	Aggregate at-risk performance remuneration	Total fixed salaries and wages payments	Employees receiving performance payments	Employees at the end of the financial year
	\$M	\$M	Number	Number
2010	3.7	36.4	232	4,513
2009	3.3	31.9	223	4,581

As there is no difference between the Economic Entity's and the Company's employee benefit disclosures, they have been presented in a combined table.

Performance payments

Permanent non-executive employees in targeted positions may be offered a contract which enables eligibility in the at-risk performance scheme. The grant date for each employee is based on the employment contract.

To be eligible for payment, employees must have a formal performance review every six months within the performance period, based on agreed performance and behaviour targets. The at-risk performance scheme is designed to focus employees on the achievement of business performance targets.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2010

NOTE 16: Employee benefits (continued)

(A) DEFINED BENEFIT OBLIGATION

Entities within the Economic Entity contribute to an industry multiple employer superannuation fund, the Electricity Supply Industry Superannuation Fund (Qld). Members, after serving a qualifying period, are entitled to benefits from this fund on retirement, resignation, retrenchment, disability or death.

The defined benefit account of this fund provides defined lump sum benefits based upon years of service and final average salary. Employee contributions to the fund are based on various percentages of their gross salaries.

The Trust Deed of the Fund states that, if the Fund winds up, after the payment of all costs and the payment of all member benefits in respect of the period up to the date of termination, any remaining assets are to be distributed by the Trustee of the Fund, acting on the advice of an actuary to the participating employers.

The Economic Entity may at any time, by notice to the Trustee, terminate its contributions. The employer has a liability to pay the monthly contributions due prior to the effective date of the notice, but there is no requirement for an employer to pay any further contributions, irrespective of the financial condition of the Fund.

The Economic Entity may benefit from any surplus in the Fund in the form of a contribution reduction. Any reduction in contributions would normally be implemented only after advice from the Fund's actuary.

The Economic Entity expects to contribute \$32.5 million to its defined benefit plans in 2011.

The amounts included in the statements of financial position arising from the Company's obligations in respect of its defined benefits plan are as follows:

	Consolidated and the Company				
	2010	2009	2008	2007	2006
	\$M	\$M	\$M	\$M	\$M

Other	-	(2.0)
Total expenses recognised in the income statements as employee expenses	17.5	11.7
Actual return on plan assets	45.8	30.5

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2010

NOTE 16: Employee benefits (continued)

	Consolidated and the Company	
	2010	2009
The principal actuarial assumptions at the end of the financial year (expressed as weighted averages) are:		
Discount rate at the end of the financial year	4.3%	4.7%
Expected return on plan assets at the end of the financial year	6.0%	6.0%
Future salary increases – year one	4.5%	4.5%
Future salary increases – long term	4.0%	4.5%

The overall expected long term rate of return on assets is 6.0% per annum. The expected long term rate of return is based on the portfolio as a whole and not on the sum of the returns on individual asset categories. The return is based exclusively on historical returns, without adjustments.

(B) DEFICIT OF DEFINED BENEFIT SUPERANNUATION FUND

Deficit

The following is a summary of the most recent financial position of the Electricity Supply Industry Superannuation Fund (QLD) calculated in accordance with AAS 25 *Financial Reporting by Superannuation Plans*:

	Last reporting date	\$M
Accrued benefits	30/06/2008	(643.5)
Net market value of plan assets	30/06/2008	643.1
Net surplus / (deficit)	30/06/2008	(0.4)

Employer contributions

Employer contributions to the defined benefit section of the plan are based on recommendations by the plan's actuary. Actuarial assessments are made at no more than three yearly intervals. The last such assessment was made as at 30 June 2008. For the financial year ended 30 June 2010, the Company paid 29% of defined benefit members' salaries.

Contribution recommendation assumptions

Contribution recommendations are based on a funding method. Under this method, future contributions are determined so that their present value is expected to be sufficient to fund the difference between:

- The value of all future benefits for existing defined benefit members; and
- The value of fund assets attributable to defined benefit members.

	Last reporting date	\$M
The principal economic assumptions used in making these recommendations include:		
Expected return on plan assets in year 1	30/06/2008	(13.0%)
Expected return on plan assets	30/06/2008	7.0%
Future salary increases	30/06/2008	5.0%

(C) DEFINED CONTRIBUTION PLANS

The Company makes contributions to defined contribution schemes in various superannuation funds. The amount recognised as expense was \$21.9 million for the year ended 30 June 2010 (2009: \$20.2 million).

NOTE 17: Provisions

	Consolidated		The Company

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2010

NOTE 17: Provisions (continued)

	Consolidated		The Company	
	2010	2009	2010	2009
	\$M	\$M	\$M	\$M
Employee benefit on-cost provisions				
Carrying amount at the beginning of the financial year	5.9	5.3	5.9	5.3
Provision made during the financial year	0.9	0.6	0.9	0.6
Provisions used during the financial year	(0.6)	-	(0.6)	-
Carrying amount at the end of the financial year	6.2	5.9	6.2	5.9
Other				
Carrying amount at the beginning of the financial year	6.7	2.6	6.0	1.6
Provision made during the financial year	39.9	6.8	39.3	5.8
Provision used during the financial year	(42.8)	(1.3)	(42.0)	-
Net transfer between categories	3.5	(1.4)	3.5	(1.4)
Carrying amount at the end of the financial year	7.3	6.7	6.8	6.0

(A) System usage charge over recovery

The system usage charge over recovery provision is used to record the decrease in revenue that the Economic Entity will be able to earn in the future financial years as a result of over-recovering DUOS and capital contribution revenue in the current and prior financial years, as determined by the regulator.

(B) Competitive neutrality

The competitive neutrality provision is used to record the liability owed to Queensland Treasury under the requirements of the Code of Practice for Government Owned Corporations' Financial Arrangements. The calculation of the provision is derived from the Economic Entity's borrowings and is intended to remove any unfair advantage obtained from borrowing at a lower interest rate than the private sector.

(C) Employee benefit on-cost provisions

The employee benefit on-cost provisions consist primarily of provisions for workers compensation and payroll tax on employee benefits.

(D) Rehabilitation

The rehabilitation provisions are an estimate of the amounts required to rehabilitate specifically identified sites occupied by substations, power stations and workshops.

NOTE 18:
Financial liabilities

Deferred income tax relating to revaluation of property, plant and equipment	(31.0)	(33.3)	(31.0)	(33.3)
Carrying amount at the end of the financial year	1,288.4	1,216.0	1,288.4	1,216.0
(C) RETAINED PROFITS				
Retained profits	441.2	403.4	332.9	289.7
Movements:				
Carrying amount at the beginning of the financial year	403.4	453.8	289.7	320.5
Actuarial gains/(losses) on defined benefit plans recognised directly in equity	12.7	(90.0)	12.7	(90.0)
Deferred income tax relating to actuarial gains/losses on defined benefit plans	(3.9)	26.9	(3.9)	26.9
Net profit for the financial year	166.5	129.3	171.9	148.9
Dividends	(137.5)	(116.6)	(137.5)	(116.6)
Carrying amount at the end of the financial year	441.2	403.4	332.9	289.7
(D) NATURE AND PURPOSE OF RESERVES				
Asset revaluation reserve				
The asset revaluation reserve relates to property, plant and equipment measured at fair value in accordance with applicable Australian Accounting Standards.				

NOTE 22: Financial instruments and financial risk management

The Economic Entity has policies and procedures in place to control the financial risks associated with its operating activities. Exposure to credit, interest rate, price, liquidity and currency risks arises in the normal course of the Economic Entity's business. Derivative financial instruments are used to hedge exposure to fluctuations in electricity prices.

FINANCIAL RISK MANAGEMENT

(A) Credit risk

Credit risk arises from the potential failure of counterparties to meet their obligations under the respective contracts at maturity.

The Economic Entity manages credit risk by maintaining an established and appropriate credit review process. Furthermore, the Economic Entity minimises concentration of credit risk by undertaking transactions with a large number of retail customers and limiting credit to any individual customer.

Where it is appropriate, collateral in the form of a cash deposit is obtained from customers as a means of mitigating the risk of financial loss from defaults. At the end of the financial year, the Economic Entity held collateral of \$15.4 million (2009: \$15.1 million). Note 25 provides details of guarantees held by the Economic Entity. At the end of the financial year, the Company did not hold any collateral.

The Economic Entity manages its credit settlement risk associated with electricity market trading by maintaining a Wholesale Trading Credit Assessment Policy. Credit settlement risk is controlled by maintaining approved counterparty credit limits. The values of counterparty credit limits are determined by reference to each counterparty's credit rating, as determined by a recognised credit rating agency or, if the counterparty does not have a credit rating, by reference to the results of a detailed credit analysis. Where considered appropriate, the Economic Entity requires counterparties who have not been rated by a credit rating agency to provide appropriate letters of credit or bank guarantees. The relevant counterparties are principally large banks and other electricity corporations.

At 30 June 2010, there were no significant concentrations of credit risk other than those disclosed below. The maximum exposure for both the Economic Entity and the Company to credit risk is represented by the carrying amount of each financial asset, including derivative financial instruments, in the statements of financial position.

Concentrations of credit risk that arise from derivative instruments exist for groups of counterparties when they have similar economic characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions. Concentrations of credit risk on electricity derivatives are indicated in the following table by percentage of the total balance receivable from counterparties in the specified categories:

	2010	2009
Counterparty classification		
Queensland Government-owned electricity entities	68%	61%
Entities with a Standard & Poors credit rating AA-	5%	7%
Entities with a Standard & Poors credit rating A-	8%	15%
Entities with a Standard & Poors credit rating BBB	9%	3%
Other entities	10%	14%

The above credit risk exposure does not take into account the value of any collateral or security. Receivables due from major counterparties are monitored regularly.

(B) Interest rate risk

Floating interest rate borrowings expose the Economic Entity to interest rate cash flow risk while fixed interest borrowings expose the Economic Entity to fair value interest rate risk.

The Economic Entity's income and operating cash flows are substantially independent of changes in short-term market interest rates. The Economic Entity borrows exclusively from QTC. Long-term borrowings from QTC are structured to approximate a fixed rate loan over the term of the Economic Entity's regulatory period. The interest rate charged on long-term borrowings is derived from debt instruments issued by QTC and a competitive neutrality fee designed to remove any unfair competitive advantage obtained from borrowing at a lower interest rate than the private sector. During the financial year ending 30 June 2010, QTC refinanced the debt instruments used to establish the interest rate charged on the Economic Entity's existing borrowings in line with the commencement of the next regulatory period. At the same time as the existing debt was refinanced, QTC hedged a portion of the Economic Entity's future borrowings for the next regulatory period by entering into Forward Starting Loans and fixing the interest rate to be charged on these additional borrowings. Movements in book interest rates on this facility will largely reflect the prevailing interest rates at the time of the refinancing and hedging. The book interest rate will also be affected by additional unhedged borrowings and the results of active management on the debt portfolio.

Other assets and liabilities exposing the Economic Entity to interest rate cash flow risk include cash and cash equivalents (floating rate interest exposure), repayable deposits (both fixed and floating interest rate exposure), receivables from jointly controlled entities (both fixed and floating interest rate exposure) and finance leases (fixed interest rate exposure).

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2010

NOTE 22: Financial instruments and financial risk management (continued)

Sensitivity analysis

At 30 June 2010, if interest rates had been 100 basis points higher or lower and all other variables were held constant, the Economic Entity's net profit and equity would increase or decrease by \$2.9 million (2009: \$12.8 million) and the Company's net profit and equity would increase or decrease by \$2.4 million (2009: \$12.6 million).

The Economic Entity's and the Company's borrowings from QTC have been classified as loans with a fixed interest rate in the following table. As discussed above, an element of these borrowings is exposed to interest rate cash flow risk. This interest rate cash flow risk has been incorporated in the preceding sensitivity analysis.

The effective interest rates on the Economic Entity's financial assets and liabilities at the balance date are detailed below.

	Floating interest rate	Fixed interest rate	Weighted average interest rate
	\$M	\$M	%
CONSOLIDATED			
2010			
Financial assets			
Cash and cash equivalents	284.2	-	4.02
Receivables due from jointly controlled entities	22.9	71.6	7.92

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2010

NOTE 22: Financial instruments and financial risk management (continued)

(C) Price risk

Electricity

Electricity price risk is the risk of an adverse financial outcome resulting from a change in the price of electricity in the National Electricity Market. This can be a change in the electricity pool price or a change in the forward price of electricity. Exposures mainly arise from positions in wholesale contracts, franchise load or PPAs. Wholesale contracts relating to franchise load are generally dealt over a period of less than three years. PPAs are measured up to the end of the contract.

The Company's Board has approved a Franchise Energy Risk Policy. The Franchise Energy Risk Policy prescribes the establishment of a trading strategy which must establish clear target hedge levels of forecast electricity requirements. The development of the trading strategy is influenced by consideration of a number of operational, technical and market parameters. The trading strategy is reviewed regularly and must be approved by the Chief Executive who is advised by the Executive Risk Management Committee. Any unhedged position exposes the Economic Entity to pool price variation.

The Economic Entity uses derivative financial instruments to manage its electricity price risk, consumer variable volume risk and cash flow risk as well as hedge exposure to pool price fluctuations and against the committed and anticipated electricity purchases. The hedge contracts are designated against the forecast mass-market electricity load. The hedge contracts are valued at fair value through profit and loss – hedge accounting is not employed. The hedge portfolio consists predominantly of swaps, caps and option contract types.

The following table details the Economic Entity's sensitivity to a 10% increase and decrease in the electricity pool price with all other variables held constant.

	+10%	+10%	-10%	-10%
	2010	2009	2010	2009
	\$M	\$M	\$M	\$M
Profit / (loss) before tax	5.7	2.4	(5.7)	(5.6)
Equity	5.7	2.4	(5.7)	(5.6)

The Company does not hold any financial assets or liabilities that are exposed to electricity price risk.

Renewable energy certificates

REC price risk is the risk of an adverse outcome resulting from a change in the current or forward price of RECs.

The Company holds RECs to meet its annual compliance obligations under the *Renewable Energy (Electricity) Act 2000* and National GreenPower Accreditation Program. A separate portfolio of RECs is held for trading purposes and includes entitlements to RECs under PPAs.

RECs held for compliance purposes are carried at cost whilst RECs held for trading are carried at fair value. The REC compliance obligation liability is carried at cost with shortfalls recognised at market price as a proxy for cost.

REC entitlements under PPAs entered into for trading purposes are carried at fair value.

Price and volume risk is managed under the Franchise Energy Risk Policy referred to above.

The following table details the Economic Entity's sensitivity to a 10% increase and decrease in current market price and forward price of RECs, with all other variables held constant.

	+10%	+10%	-10%	-10%
	2010	2009	2010	2009
	\$M	\$M	\$M	\$M
Profit / (loss) before tax	6.5	4.4	(6.5)	(4.4)
Equity	6.5	4.4	(6.5)	(4.4)

The Company does not hold any financial assets or liabilities that are exposed to REC price risk.

(D) Liquidity risk

Liquidity risk is the risk that the Economic Entity will not be able to meet its financial obligations as they fall due. Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close-out market positions. Due to the dynamic nature of the underlying businesses, the Economic Entity aims to maintain flexibility in funding by keeping committed credit lines available. Available lines of funding are disclosed in Note 15.

Liquidity risk associated with electricity market trading is controlled by Australian Energy Market Operator (AEMO) whereby all market participants are required to deliver irrevocable bank guarantees as security for timely settlement.

These guarantees are held for and on behalf of all participants thereby limiting exposure to liquidity risk.

Where entities within the Economic Entity enter into contracts external to the regulated market, such contracts are limited in terms of exposure and value. The contracts are entered into with only those counterparties that have an appropriate credit rating as determined by a recognised credit rating agency. All contracts contain credit limit clauses.

Under the funding arrangements entered into between the Company and the Treasurer (via QTC), the Company seeks approval from the Treasurer (via QTC) for funding requirements for the coming year on an annual basis. These approved borrowings form part of the Government Owned Corporations borrowing programme undertaken by the State of Queensland. For the year ending 30 June 2010, the Company has secured approval for additional borrowings to meet forecast operational requirements. Should further additional funds beyond this requirement be needed to maintain liquidity and/or meet operational requirements, approval for additional funds must be sought from the Treasurer (via QTC).

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2010

NOTE 22: Financial instruments and financial risk management (continued)

The tables below disclose the Economic Entity's and the Company's financial liabilities, including derivative financial instruments, into relevant maturity groupings based on the remaining period at the reporting date to the contractual maturity date. The amounts disclosed in the table are contractual, undiscounted cash flows. The maturities of derivative financial instruments are calculated on the basis that derivatives will be settled on a gross basis. The Economic Entity's and the Company's borrowings from QTC have interest only in perpetuity repayment profiles. The principal component of QTC borrowings are included in the over five year's time band with no interest included in respect of this facility for the period over five years.

	Less than 1 year	1 to 5 years	Over 5 years	Total contractual cash flows	Carrying amount

Total	816.0	946.5	3,823.6	5,586.1	3,919.1

(E) Foreign currency risk

The Economic Entity's trading operations are based in Australia and consequently it is not exposed to significant foreign currency risk. The only entity within the Economic Entity exposed to foreign currency risk is Ergon Energy Corporation Limited.

(F) Fair value

The fair value of a financial asset or a financial liability is the amount at which the asset could be exchanged, or liability settled in a current transaction between willing parties after allowing for transaction costs.

The carrying amounts of financial assets and financial liabilities are not materially different from their estimated fair values at the end of the financial year, unless otherwise stated.

Financial assets and liabilities not fair value accounted and classified as non-current are discounted to determine the fair value using a risk free interest rate where the impact of discounting is considered material.

Net fair value losses are included in other expenses in the income statement.

Fair value measurements

As of 1 July 2009, the Economic Entity has adopted the amendment to AASB 7 *Financial Instruments: Disclosures* which requires disclosure of fair value measurements by level of the following fair value measurement hierarchy:

- a) Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1);
- b) Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices) (level 2), and
- c) Inputs for the asset or liability that are not based on observable market data (unobservable inputs) (level 3).

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2010

NOTE 22: Financial instruments and financial risk management (continued)

The following table presents the Economic Entity's assets and liabilities measured and recognised at fair value at 30 June 2010.

	Level 1	Level 2	Level 3	Total
	\$M	\$M	\$M	\$M
CONSOLIDATED – AT 30 JUNE 2010				
Assets				
Electricity hedges	-	2.5	3.9	6.4

Liabilities				
Opening balance	-	-	-	-
Unrealised gains or losses recognised in income statement	(14.8)	(0.7)	-	(15.5)
Closing balance	(14.8)	(0.7)	-	(15.5)

METHODS AND ASSUMPTIONS USED IN DETERMINING FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES

The Economic Entity currently has five different classes of financial instruments that are measured at fair value through profit and loss. These are: swaps, options, PPAs, RECs and LEP.

Swaps

Swaps are valued using a curve sourced from the SFE. Where positions are held in periods beyond the curve, the curve is extended accordingly.

Options

(i) \$300 Exchange Traded Options

\$300 Exchange Traded Options are valued using the SFE \$300 cap curve.

(ii) Caps

\$300 caps are valued using the SFE \$300 cap curve. Where positions are held in periods beyond the curve, the curve is extended until these positions expire. \$100 caps are valued based on a curve derived from the \$300 cap curve.

(iii) Swaptions

Swaptions are valued applying a Black Scholes 76 methodology incorporating an input or curve sourced from the SFE curve.

Power purchase agreements

Electricity entitlements under PPAs are valued using a curve sourced from the SFE. Load volumes under fair valued PPAs are determined based on forecasts.

Renewable energy certificates

REC entitlements are valued using a curve derived from externally sourced broker quotes. Where positions are held in periods beyond the curve, the curve is extended accordingly. REC volumes under fair valued PPAs are determined based on forecasts.

Long-term energy procurement

The LEP instrument is made up of revenue from tiered target hedging levels valued against a curve sourced from the SFE and the operation of a cap and floor arrangement with the Queensland State Government.

The following table details the sensitivity to a 10% increase and decrease in forecast load of PPAs and price of all other instruments in Level 3 with all other variables held constant:

	Reflected in income statement	
	Favourable	Unfavourable
	2010	2010
	\$M	\$M
Power purchase agreements	2.3	(2.3)

(G) Capital management

The Economic Entity manages its capital to ensure that it will be able to continue as a going concern while maximising the return to shareholders through the optimisation of the debt and equity balance. The Economic Entity's overall strategy remains unchanged from 2009.

The capital structure of the Economic Entity consists of borrowings disclosed in Note 15 and equity comprising issued capital, owners' contributions, reserves and retained earnings disclosed in Notes 20 and 21.

The Economic Entity borrows exclusively from QTC. The facility provided by QTC has an interest only in perpetuity repayment profile. The cost of debt is derived from debt instruments issued by QTC and a competitive neutrality fee designed to remove any unfair competitive advantage obtained from borrowing at a lower interest rate than the private sector.

The Company's Board of directors approves benchmarks within which debt financing must be managed. QTC manages debt financing, including new debt raising and the re-financing of existing borrowings, on behalf of the Economic Entity. QTC borrows in advance of requirements to ensure Queensland public sector entities have ready access to funding when required and also to reduce the risk associated with refinancing maturing loans.

The Economic Entity's existing borrowings will be refinanced in the next financial year in line with the commencement of the next regulatory period. The Economic Entity is required to maintain minimum financial ratios under QTC's lending terms and conditions. The Economic Entity must maintain an earnings before interest, tax, depreciation and amortisation (EBITDA) interest coverage of greater than or equal to 1.5 times, except where the total debt to total capital is greater than 70% in which case the EBITDA interest coverage must be equal to or greater than 2.0 times.

Operating cash flows are used to maintain and expand the Economic Entity's operating assets, as well as to make the routine outflows of dividends and repayment of maturing debt. The Economic Entity's policy is to borrow centrally to meet anticipated funding requirements.

The Economic Entity monitors capital on the basis of monthly key financial ratios for gearing, interest cover and return on equity. At 30 June 2010 and 30 June 2009 these key financial ratios were as follows:

	Consolidated		The Company	
	2010	2009	2010	2009
Gearing ratio	59.8%	59.1%	60.7%	60.1%
Interest cover (times)	3.2	3.1	3.1	3.1
Return on equity	6.4%	5.1%	6.9%	6.1%

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2010

NOTE 23: Commitments

	Consolidated		The Company	
	2010	2009	2010	2009
	\$M	\$M	\$M	\$M
CAPITAL AND OTHER EXPENDITURE COMMITMENTS				
Estimated capital and other expenditure contracted for at the end of the financial year but not recognised as liabilities is as follows:				
Not later than one year	46.2	162.7	43.6	159.5
Later than one year but not later then five years	24.0	15.6	15.3	6.2
Later than five years	0.5	2.0	-	-
	70.7	180.3	58.9	165.7

LOAN COMMITMENTS				
Commitments for future loans with QTC at a fixed average rate of 7.57% (2009: Nil) are as follows:				
Not later than one year	352	-	352	-
Later than one year but not later then five years	1,388	-	1,388	-
Later than five years	-	-	-	-
	1,740	-	1,740	-

OPERATING LEASE COMMITMENTS				
Non-cancellable operating lease commitments are detailed in Note 24.				

NOTE 24: Leases

FINANCE LEASE LIABILITIES

Finance lease liabilities are effectively secured as the rights to the leased assets recognised in the financial statements revert to the lessor in the event of default.

The finance lease liability relates to FACOM/CMS software and associated systems with a lease term of three years. The Company has the right to purchase directly or transfer to SPARQ Solutions Pty Ltd the assets for the original value of \$5.3 million less accumulated amortisation to the time of transfer or sale, or if at the end of the lease term, for zero value.

	Consolidated and the Company			
	Minimum future lease payments		Present value of minimum future lease payments	
	2010	2009	2010	2009
	\$M	\$M	\$M	\$M
Not later than one year	1.9	1.9	1.9	1.8
Later than one year but not later than five years	-	2.0	-	1.9
Minimum future lease payments	1.9	3.9	1.9	3.7
Less future finance charges	-	(0.2)	-	-
Present value of minimum lease payments	1.9	3.7	1.9	3.7
Included in the financial statements (Note 15)

Finance lease liabilities -non-current			-	1.9
			1.9	3.7

OPERATING LEASES

Non-cancellable operating lease commitments

	Consolidated and the Company	
	2010	2009
	\$M	\$M
Not later than one year	6.8	5.9
Later than one year but not later than five years	11.3	11.1
Later than five years	1.0	1.0
	19.1	18.0
In respect of non-cancellable operating leases the following liabilities have been recognised:		
Included in the financial statements (Note 19)		
Lease incentive liability - current	0.6	0.5
Lease incentive liability - non-current	0.8	1.3
	1.4	1.8

The Economic Entity leases various office, workshop and storage space under non-cancellable operating leases expiring within one to 17 years. The leases have varying terms, escalation clauses and renewal rights. On renewal, the terms of the leases are re-negotiated.

The Economic Entity's significant leasing arrangements have terms of renewal of two and three years and escalation clauses of 4% per annum. There is one significant leasing arrangement in place which does not contain a renewal option.

Non-cancellable operating lease receivables		
Not later than one year	0.1	0.9
Later than one year but not later than five years	-	0.2
	0.1	1.1

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2010

NOTE 25: Contingencies

(A) Legal claims

A number of common law claims are pending against entities within the Economic Entity. In each case, a writ has been served and the entity is at various stages of defending the actions. Liability is not admitted and all claims will be defended. The total amount of these claims is \$7.3 million (2009: \$2.7 million). These claims are disclosed on a gross basis and exclude possible reimbursement through insurance recoveries.

(B) Guarantees

Bank guarantees amounting to \$0.2 million (2009: \$0.4 million) have been issued to various parties in connection with the Company's contracting services operations. These guarantees are supported by counter indemnities to QTC from the Company totalling \$2.5 million (2009: \$2.5 million).

In order to participate in the electricity market, entities within the Economic Entity were required to deliver acceptable security as collateral for their obligations arising as a consequence of normal trading. Security, in the form of payment guarantees totalling \$120.0 million (2009: \$120.0 million), has been issued by QTC to the Australian Energy Market Operator. These guarantees are supported by counter indemnities to QTC from the Company totalling \$350.0 million (2009: \$350.0 million).

The Company has provided an unconditional guarantee to its subsidiary Ergon Energy Queensland Pty Ltd (EEQ) to enable EEQ to operate as an Australian Financial Services Licensed entity pursuant to ASIC's requirements.

(C) Guarantees held

The Economic Entity holds bank guarantees from customers totalling \$166.9 million (2009: \$138.6 million) relating to the construction of capital assets for energy customers.

(D) Environmental liabilities

The Economic Entity provides for all known environmental liabilities. While the directors believe that, based upon current information, its provisioning for environmental rehabilitation is appropriate, there can be no assurance that material provisions will not be required because of new information or regulatory requirements with respect to known sites or identification of new remedial obligations at other sites.

(E) Over-surrender of GreenPower RECs

In the 2008/09 financial year, the Economic Entity over-surrendered 28,412 RECs to GreenPower in error. This resulted in negotiations with GreenPower over the Economic Entity's ability to obtain a credit for the over-surrender against the 2009 REC liability. On 16 July 2010, the Economic Entity received confirmation from the National GreenPower Steering Group that a credit for the over-surrender will be received, provided certain conditions are met. Assuming these conditions are met, this will result in a reduction in expenses of \$1.1 million.

(F) Queensland Competition Authority (QCA) review

The QCA has requested that the Economic Entity undertake a review of the amounts that it has charged customers in relation to customer initiated capital work. The Economic Entity is currently undertaking this review and at this time the amount of any liability cannot be reliably determined.

NOTE 26:
Consolidated entities

	Country of incorporation	Percentage Interest Held by the Economic Entity ¹	
		2010	2009
THE COMPANY			
Ergon Energy Corporation Limited	Australia		
CONTROLLED ENTITIES			
Ergon Energy Queensland Pty Ltd	Australia	100%	100%
Ergon Energy Telecommunications Pty Ltd	Australia	100%	100%

¹ The proportion of ownership interest is equal to the proportion of voting power held.

The Company provides management services to its subsidiaries. Accordingly, Ergon Energy Queensland Pty Ltd and Ergon Energy Telecommunications Pty Ltd do not have their own management structures.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2010

NOTE 27:

Investments accounted for using the equity method

	Consolidated		The Company

NOTE 29: Key management personnel disclosures

(A) Details of directors

The directors of the Company during the financial period ended 30 June 2010 were:

Ralph Craven	Chairman / Non-Executive Director	
John Bird	Deputy Chairman / Non-Executive Director	
Susan Forrester	Non-Executive Director	
Gary Humphrys	Non-Executive Director	Appointed 1 October 2009
Anthony (Tony) Mooney	Non-Executive Director	
Wayne Myers	Non-Executive Director	
Helen Stanton	Non-Executive Director	

Ralph Craven and Wayne Myers have been appointed until 30 September 2011.

Gary Humphrys has been appointed until 30 September 2012.

All other directors have been appointed until 30 September 2010.

Tony Mooney resigned as a director 20 July 2010.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2010

NOTE 29: Key management personnel disclosures (continued)

(B) Compensation - Directors

Directors' emoluments are set by State Government regulation, with other fees and allowances determined on the basis of meetings attended and expenditure incurred in performing their roles as directors of the Company.

The non-executive directors of the Company do not participate in any variable reward or 'at-risk' plan.

Amounts disclosed for remuneration of key management personnel exclude insurance premiums paid by the Company in respect of directors' liability and officers' liability insurance contracts.

In accordance with Ministerial Guidelines, details of compensation provided to directors in office during the financial period ended 30 June 2010 by the Economic Entity and the Company, are as follows:

DIRECTOR	Short term benefits				Post employment benefits		TOTAL	
	Directors' fees		Committee fees		Superannuation		2010	2009
	2010	2009	2010	2009	2010	2009		
\$'000	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000	
Ralph Craven	74	54	16	12	8	6	98	72
John Bird	28	33	11	12	4	4	43	49
Susan Forrester	29	21	4	3	3	2	36	26
Gary Humphrys ⁽¹⁾	21	-	5	-	2	-	28	-
Tony Mooney	32	22	8	6	3	2	43	30
Wayne Myers	28	28	13	11	4	3	45	42
Helen Stanton	28	28	9	8	3	3	40	39
Terri Hamilton ⁽²⁾	-	28	-	8	-	3	-	39
Keith Hilless ⁽³⁾	-	18	-	47 ⁽⁴⁾	-	6	-	71
Andrew Robertson ⁽³⁾	-	7	-	1	-	1	-	9
Barry Taylor ⁽³⁾	-	7	-	2	-	1	-	10
Total compensation	240	246	66	110	27	31	333	387

⁽¹⁾ Gary Humphrys was appointed as director of the Company on 1 October 2009.

⁽²⁾ Terri Hamilton resigned as director of the Company on 30 June 2009.

⁽³⁾ Keith Hilless, Andrew Robertson and Barry Taylor resigned as directors of the Company on 30 September 2008.

⁽⁴⁾ Included in this number is an amount for Committee fees which were paid during the year but relate to meetings held between 1 July 2002 and 30 September 2008.

No further fees were paid to directors, other than the amounts disclosed in the table.

The total of all amounts paid or payable, directly or indirectly, from the respective entities of which they are a director, or from any related party, to all the directors of each entity in the Economic Entity was \$340 thousand (2009: \$387 thousand). The above amounts exclude the value of insurance premiums made for the directors' indemnity.

(C) Compensation - Executives

The People Committee recommends executive remuneration to the Company's Board as part of an annual review. Input is sought from industry and market surveys (as deemed suitable by the shareholding Ministers) when determining the level of remuneration for these positions. Final approval is then required from the Board, ensuring that remuneration arrangements for the executives are appropriate. The shareholding Ministers are notified of the details.

A Total Fixed Remuneration (TFR) concept for the structure of executive remuneration is utilised. While the total cost of an executive's remuneration package is capped, the executive then has the flexibility to decide the composition of the total fixed remuneration, which could include cash salary, motor vehicle, car park and additional superannuation, plus any fringe benefits tax incurred.

No other non-cash benefits are provided to executives as the TFR concept captures various benefits structured within a total cost rather than a base salary plus benefits approach.

Executive staff members are eligible for an 'at risk' or variable component that is directly linked to both the overall performance of the Economic Entity and their individual efforts against a range of key indicators, for example financial, operational and customer excellence, people development, risk management and growth. The Board sets the initial 'target' goals, from the annual Statement of Corporate Intent. Any 'at risk' payment is contingent upon the Board's assessment of the Company's overall performance.

Performance payments may not exceed a maximum of 15% of the individual's TFR figure.

Most executives are engaged on an outer limit contract for a period of 3 years. Three executives are engaged on tenured contracts.

Separation entitlements for all executives are subject to the normal terms and conditions of their contracts with the Company.

For executives engaged on tenured contracts prior to 2005, where separation is due to redundancy, a termination payment is made comprising all entitlements accrued under the contract. The severance entitlement also includes a redundancy payment equivalent to two weeks of TFR per continuous year of service in excess of two (2) years service up to a maximum of 26 weeks. This entitlement lapses if an offer of alternative employment is received from a Queensland Government entity covered by the *Electricity Act 1994* for which the executive's competencies and vocational abilities are suited prior to termination of the executives employment with the Company.

For executives engaged on an outer limit contract, where the executive's employment terminates on the termination date, in circumstances where the Economic Entity has not offered the executive further employment beyond the termination date, the Economic Entity will pay the executive a severance payment equal to 12 weeks of the TFR. Where the Company terminates the executive's employment prior to the termination date otherwise than for unsatisfactory performance, misconduct or incapacity, the executive is entitled to a termination payment equal to the greater of:

- (a) 13 weeks salary; or
- (b) 2 weeks salary per year of continuous service with the Company up to a maximum 52 weeks salary; and

A separation payment, equal to the greater of:

- (a) 13 weeks TFR; or
- (b) A sum equal to 20% of the TFR that the executive would have earned had the employment continued from the day after the notice period ceased until the termination date.

(E) Transactions with related parties of key management personnel

Key management personnel of the Economic Entity and of its related parties or their related parties conduct transactions with entities within the Economic Entity on terms and conditions no more favourable than those available, or which might reasonably be expected to be available, on similar transactions to non-related entities on an arm's length basis.

All transactions with key management personnel or related parties that occurred during the financial year are trivial or domestic in nature, apart from those noted below. The related party disclosures are those in connection with the Economic Entity.

Ian McLeod, Mal Leech, Greg Evans, John Hooper and Justin Fitzgerald were executives of the Company and directors of SPARQ Solutions Pty Ltd, a jointly controlled entity during the financial year. Greg Evans resigned as a director on 28 August 2009 and Mal Leech resigned as a director on 15 February 2010. John Hooper and Justin Fitzgerald were appointed as directors on 15 February 2010. They did not receive any remuneration for their positions as directors of this entity. During the year SPARQ Solutions Pty Ltd provided services and recoveries to the wholly owned group to the

value of \$74,530 thousand (2009: \$63,077 thousand) and received services and recoveries from the wholly owned group of \$152,994 thousand (2009: \$129,085 thousand). In addition the Company sold assets to SPARQ Solutions Pty Ltd during the year totalling \$4,211 thousand (2009: \$nil) at a profit/(loss) of \$nil (2009: \$nil).

Greg Evans and Justin Fitzgerald were executives of the Company and directors of Service Essentials Pty Ltd, a dormant associate company during the financial year. Greg Evans resigned as a director on 28 August 2009. No remuneration was received for their positions from this entity.

Justin Fitzgerald, an executive of the Company, is a director of Electricity Credit Union Limited. During the financial year the Electricity Credit Union Limited provided services to the wholly owned group to the value of \$118 thousand (2009: \$124 thousand).

A number of directors are the directors of organisations that are franchise customers of Ergon Energy Queensland Pty Ltd.

(F) Loans to key management personnel

The Economic Entity has not made any loans to key management personnel in either the current or the prior financial year.

⁽⁸⁾ Officer was in an acting capacity from 1 September 2008 to 8 January 2010.

⁽⁹⁾ Officer was in acting capacity from 19 December 2006 until 31 August 2008.

⁽¹⁰⁾ The title of this position was changed from Executive General Manager – Corporate Sustainability and Innovation as a result of a restructure of the Company on 2 November 2009.

⁽¹¹⁾ The TFR package for this officer was agreed on 26 September 2008 and back-dated to the appointment date of 22 February 2008. As a result, the prior year's salary and fees figure includes approximately four months of backdated pay relating to the 2008 financial year.

⁽¹²⁾ Balance includes the effect of the officer's increase in hourly salary rate on existing annual and long service leave balances at the beginning of the year.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2010

NOTE 30: Related party transactions

The Company provided business management, financial and corporate services and customer care administration services, (including retail products and services administration) to a controlled entity. All services were undertaken on normal commercial terms and conditions.

Amounts due and receivable from related parties in the wholly owned group are as set out in the respective notes to the financial statements.

Entities subject to common control

The Company is a Queensland Government Owned Corporation, with all shares held by shareholding Ministers on behalf of the State of Queensland. All State of Queensland controlled entities meet the definition of other related parties of the Company.

Transactions with State of Queensland controlled entities

The Economic Entity and the Company transact with other State of Queensland controlled entities. All material transactions are negotiated on terms equivalent to those that prevail in arm's length transactions.

Details of material related party transactions and balances, as reported in the income statements and statements of financial position, are disclosed below:

	Consolidated		The Company	
	2010	2009	2010	2009

The wholly owned group has advanced unsecured loans to jointly controlled entities and associates. The loans are interest bearing with rates between 5.13% and 8.50 % (2009: between 5.07% and 9.60%). The amounts outstanding at balance date were \$59,516 thousand (2009: \$68,478 thousand).

Amounts due and receivable from jointly controlled entities and associates are as set out in the respective notes to the financial statements.

Transactions with other related parties

During the year, the Economic Entity paid contributions of \$55,013 thousand (2009: \$34,762 thousand) to defined benefit and accumulation superannuation plans on behalf of employees.

Ultimate parent entity

The ultimate parent entity within the Economic Entity is Ergon Energy Corporation Limited.

Ownership interests in related parties

Interests in the following classes of related parties are set out in the following notes:

- Consolidated entities: Note 26
- Associates and jointly controlled entities: Note 27

No events of a material nature have occurred since the end of the financial year that significantly affected or may significantly affect the operations of the Economic Entity or the Company.

DIRECTORS' DECLARATION

FOR THE YEAR ENDED 30 JUNE 2010

In the directors' opinion:

1. The financial statements and associated notes, set out on pages 7 to 75:
 - (i) Comply with the Australian Accounting Standards and Interpretations;
 - (ii) Are in accordance with the *Corporations Act 2001*; and
 - (iii) Give a true and fair view of the financial position of the Economic Entity as at 30 June 2010 and of its performance, as represented by the results of its operations and cash flows, for the year ended on that date.
2. There are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

Made in accordance with a resolution, made in Brisbane, by the directors.

Dr R Craven
Chairman
27 August 2010

INDEPENDENT AUDITOR'S REPORT

To the Members of Ergon Energy Corporation Limited and its controlled entities

Matters relating to the Electronic Presentation of the Audited Financial Report

The auditor's report relates to the financial report of Ergon Energy Corporation Limited and its controlled entities for the financial year ended 30 June 2010 included on Ergon Energy's website. The Directors are responsible for the integrity of the Ergon Energy website. I have not been engaged to report on the integrity of the Ergon Energy website. The auditor's report refers only to the statements named below. It does not provide an opinion on any other information which may have been hyperlinked to/from these statements. If users of the financial report are concerned with the inherent risks arising from electronic data communications they are advised to refer to the hard copy of the audited financial report, available from Ergon Energy and its controlled entities, to confirm the information included in the audited financial report presented on this website.

These matters also relate to the presentation of the audited financial report in other electronic media including CD Rom.

I have audited the accompanying financial report of Ergon Energy Corporation Limited and its controlled entities, which comprises the statement of financial position as at 30 June 2010, and the income statement, the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year ended on that date, a summary of significant accounting policies, other explanatory notes and the directors' declaration of the consolidated entity comprising the Company and the entities it controlled at the year's end or from time to time during the financial year.

Directors' Responsibility for the Financial Report

The directors of the Company are responsible for the preparation and fair presentation of the financial report in accordance with Australian Accounting Standards (including the Australian Accounting Interpretations) and the *Corporations Act 2001*. This responsibility includes establishing and maintaining internal controls relevant to the preparation and fair presentation of the financial report that is free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

My responsibility is to express an opinion on the financial report based on the audit. The audit was conducted in accordance with the *Auditor-General of Queensland Auditing Standards*, which incorporate the Australian Auditing Standards. These auditing standards require compliance with relevant ethical requirements relating to audit engagements and that the audit is planned and performed to obtain reasonable assurance whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgment, including the assessment of risks of material misstatement in the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

I believe that the audit evidence obtained is sufficient and appropriate to provide a basis for my audit opinion.

Independence

The *Auditor-General Act 2009* promotes the independence of the Auditor-General and all authorised auditors. The Auditor-General is the auditor of all Queensland public sector entities and can only be removed by Parliament.

The Auditor-General may conduct an audit in any way considered appropriate and is not subject to direction by any person about the way in which audit powers are to be exercised. The Auditor-General has for the purposes of conducting an audit, access to all documents and property and can report to Parliament matters which in the Auditor-General's opinion are significant.

In conducting the audit, the independence requirements of the *Corporations Act 2001* have been complied with.

Auditor's Opinion

In my opinion -

(a) the financial report of Ergon Energy Corporation Limited and its controlled Entities is in accordance with the *Corporations Act 2001*, including -

- (i) giving a true and fair view of the company's and consolidated entity's financial position as at 30 June 2010 and of their performance for the year ended on that date; and
- (ii) complying with Australian Accounting Standards (including the Australian Accounting Interpretations) and the Corporations Regulations 2001.

Timothy Biggs
(as Delegate of the Auditor-General of Queensland)

27 August 2010
Brisbane

AUDITOR'S INDEPENDENCE DECLARATION

To the Directors of Ergon Energy Corporation Limited and its controlled entities,

This audit independence declaration has been provided pursuant to s. 307C of the *Corporations Act 2001*.

Independence Declaration

As lead auditor for the audit of Ergon Energy Corporation Limited and its controlled entities, for the year ended 30 June 2010, I declare that, to the best of my knowledge and belief, there have been –

- a) no contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and
- b) no contraventions of any applicable code of professional conduct in relation to the audit.

Yours Sincerely,

Handwritten signature of Timothy Biggs in black ink, appearing as 'Timothy B77'.

Timothy Biggs

SUMMARY OF STATEMENT OF CORPORATE INTENT 2009/10

Our performance against our 2009/10 Statement of Corporate Intent (SCI) targets are summarised here, as an overview, against our Key Result Areas. Each area of our performance is discussed in more detail throughout our Annual Stakeholder Report 2009/10.

KEY RESULT AREA	PERFORMANCE AGREEMENT 2009/10	PERFORMANCE RESULTS 2009/10	
Customers and Community Meet reasonable customer expectations for service delivery and choice while delivering economic and social benefits to the community.	Value to Customer $\geq 7.1^1$	A below target average Value to Customer 7.0 out of 10 was due largely to the economic uncertainty and electricity price perceptions (p 15).	X
Assets and Network Performance Drive network performance improvement across security, quality, reliability and availability of supply balancing both commercial and customer perspectives without sacrificing safety.	Supply Reliability Indicators: Duration (SAIDI) - Urban ≤ 150 - Short Rural ≤ 430 - Long Rural ≤ 980 Frequency (SAIFI) - Urban ≤ 2.0 - Short Rural ≤ 4.0 - Long Rural ≤ 7.5	Supply reliability performance was impacted by work safe constraints, as well as the storm season (p 33): Duration (SAIDI) - Urban 222 - Short Rural 544 - Long Rural 999 Frequency (SAIFI) - Urban 2.25 - Short Rural 4.58 - Long Rural 7.19	X
Works Management and Delivery Deliver works program on time and on budget through innovation, technology, standardisation, design and packaging.	Priority 'alpha' projects delivered, on time and on budget $\geq 85\%$ Network Maintenance Plan delivered $\geq 95\%$	79% of our priority projects were delivered on time and on budget (p 25). The Network Maintenance Plan was 97% delivered (p 31).	X ✓
Operational Excellence Target best practice productivity through improved information management, simplified processes and innovation.	Business Plan complete $\geq 90\%$ Operating Expenditure per Customer $\leq \$107.6^2$	Ergon Energy's Business Plan, which includes initiatives to move towards best practice productivity and efficiency, was 99% complete. Operating Expenditure per Customer to \$108.6 (p 15-16).	✓ X
Our People Be a preferred employer in regional Queensland with a high performance, professional, values-based culture.	Employee 'Have Your Say Survey' Index ≥ 12	The Employee 'Have Your Say Survey' result was 13 – a strong result considering the organisational change under way (p 49).	✓
Health and Safety Target zero injuries within our workplace and wider community.	20% reduction on the 2008/09 All Injuries Frequency Rate ³ of 11.8; equating to a target of ≤ 9.4 20% reduction on the Dangerous Electrical Events Frequency Rate – Employees of 3.2; a target of 2.6 20% reduction on the Dangerous Electrical Events (DEEs) – Unassisted Asset Failure of 342; a target of ≤ 274	Safety remains a significant management concern (p 35): All Injuries Frequency Rate was 14.06 Dangerous Electrical Events Frequency Rate – Employees; 5.29 Dangerous Electrical Events (DEEs) – Unassisted Asset Failure; 394	X
Environmental Performance Deliver best practice environmental outcomes.	AS/NZS/ISO/14001 Accreditation maintained	Accreditation maintained in 2009/10, with no significant environmental incidents (p 69).	✓
Climate Change Response Address climate change as both a social responsibility and business strengthening opportunity.	Tonnes of CO ₂ Emitted $\leq 43,297^4$	43,137 Tonnes of CO ₂ Emitted (p 40)	✓
Economic Performance and Governance Be high performing and commercially focused organisation delivering economic value within a sound corporate governance framework.	Net Profit After Tax $\geq \$94.7$ million	A solid Net Profit After Tax \$166.5 million, exceeded our performance commitment (p 54).	✓

¹ The Value2Customer measure provides a measure out of 10 for the value provided to the customer by Ergon Energy; taking into account Electricity Supply, Customer Interaction Experience, Corporate Social Responsibility and Cost/Affordability.

² This is a new measure which uses regulated operating expenditure, divided by the number of regulated customers. Captures a limited area of our operating expenditure (Customer Service, Meter Reading, Network Operation, Training) not inspection and maintenance of the network.

³ The All Injuries Frequency Rate (AIFR) includes Lost Time Injuries (LTIs) and Medical Treatment Injuries (MTIs).

⁴ This target covers emissions from fleet, air travel and property energy usage only.

SUMMARY OF STATEMENT OF CORPORATE INTENT 2010/11

For the coming year 2010/11, we have moved to reporting our corporate performance measures against our strategic priorities in line with government guidelines. This move will increase engagement on the elements of the strategy and on the areas that we believe are the most critical factors for our longer-term success.

CORPORATE STRATEGY 2010/11	PERFORMANCE OUTCOMES	PERFORMANCE AGREEMENT 2010/11	
		MEASURES	TARGETS
Strategic Priority: Customer-Driven: Cost Efficient, Dependable and Smart	Meet reasonable customer expectations for service delivery and choice while delivering economic and social benefits to the community.	We will benchmark our performance with our peers across the customer dimensions of: Electricity Supply; Customer Interaction Experience; Corporate Social Responsibility and Cost/Affordability	Better than peer average as measured by 'Value to Customer' survey.
Strategic Priority: A Leader in Safety	Target zero injuries within our workplace and wider community.	We will measure our performance against the AIFR safety metric and reduce injury levels in line with longer-term trend targets.	All Injuries Frequency Rate – Employees & Contractors ≤13.74 Lost Time Injuries Frequency Rate – Employees ≤ 7.58 Lost Time Injuries Duration Rate – Employees ≤ 60.0 Lost Time Injuries Frequency Rate – Contractors ≤ 1
Strategic Priority: Leverage Climate Change	Leverage climate change as both a social responsibility and as a business strengthening opportunity.	We will continue to reduce our carbon emissions in the areas of fleet, property and travel to meet State Government and corporate set targets. We will secure regulatory and external funding to advance energy conservation, efficiency and demand management initiatives.	
Strategic Priority: Asset Management Excellence	Deliver for our customers a secure, reliable and quality electricity supply that effectively balances both commercial and customer perspectives without sacrificing safety.	Our network will perform at or better than the Minimum Services Standards set in the Electricity Industry Code for System Average Interruption Duration Index (SAIDI indicates the total minutes, on average, that customer are without electricity) and System Average Interruption Frequency Index (SAIFI indicates the average number of occasions each customer is interrupted).	Supply Reliability Indicators: Duration (SAIDI): - Urban ≤ 149 - Short Rural ≤ 424 - Long Rural ≤ 964 Frequency (SAIFI) - Urban ≤ 1.98 - Short Rural ≤ 3.95 - Long Rural ≤ 7.40
Strategic Enabler: Processes & Systems: Operational Excellence	Be a high performing and commercially focused organisation delivering economic value within a sound corporate governance framework.	We will manage to our operational and capital investment expenditure within the aggregate five year allowances used by the Australian Energy Regulator in our final 2010-15 revenue determination. The aggregated operating and capital works programs will be delivered on time and within budget.	Actual operating expenditure with regulator allowance. Actual capital expenditure with regulator allowance.
	Deliver best practice environmental outcomes.	We will maintain our Environmental and Safety Certifications; AS/NZS ISO 14001 Environment Standard and AS4801/ISO 18001 Safety Standards.	
Strategic Enabler: People: Embed High Performance Culture	Be a preferred employer in regional Queensland with a high performance, professional, values based culture.	We will further improve productivity and efficiency through successful implementation of the new organisational structure.	Improved employee productivity, performance and culture (entropy).
