

#### PURPOSE

Queensland Globe is an online interactive tool that turns physical, geographical and spatial data about a particular location into map format.

Use Queensland Globe to access hundreds of spatial data layers on Queensland roads, property and land parcels, topography, mining and exploration, land valuations, natural resources (vegetation, water, soil etc.) and more.

This instruction document is for use by any party needing to find lot and plan numbers to complete fields in the Ergon Energy Electrical Partners Portal.

How to Find Lot and Plan Numbers Using Queensland Globe

6. Enter the relevant street address. The search results will be displayed; you may then select the correct option by hovering over and clicking on it.

How to Find Lot and Plan Numbers Using Queensland Globe

7. The searched property will be identified on the map by a blue circle. Zoom in on the blue circle by double clicking on it until the Lot and Plan number are visible.

Note: If you scroll with your mouse over the blue circle, it may move away from the centre of the screen.
