# Approved Unmetered Supply Devices

There are two different types of unmetered supply devices (UMS devices):

- pole mounted UMS devices which can be mounted on our poles
- UMS devices which are not mounted on our poles.

The UMS devices listed below are already approved for connection and they usually only require a basic connection service.

**NOTE:** If your device is not on the list below (e.g. rail crossing signals and irrigation controllers) it may be on our [Unmetered Supply Devices Needing Assessment \(PDF\)](#).
