What to do if your vehicle brings down powerlines

1. **Stay in the cab**
   - If there's an immediate danger, like fire, and evacuation is ABSOLUTELY necessary, assess your escape route and check for fallen powerlines.

2. **Call 000**
   - Exit the vehicle by jumping - make sure to land with both feet together.
   - When jumping, don't touch the vehicle and the ground at the same time.
   - Once landed with both feet together (careful not to stumble or fall), jump or shuffle with your feet together away from the vehicle.

3. **Wait for help**
   - Move in this way until you are at least 10 metres away from the vehicle. DO NOT go back.

10 metres
