

Application for Network Connection of an Unmetered Supply Device

Privacy Notice

Ergon Energy is collecting information on this Application for Network Unmetered Supply Form for the purpose of assessing your Connection Application. This may include the collection of your personal information. Your personal information will not be disclosed to any external third parties without your consent, unless authorised or required by law. If you wish to apply for access to this information or make a privacy complaint, you may contact the Right to Information & Privacy Officer on (07) 3851 6000, or visit ergon.com.au to obtain access application and privacy complaint forms. If you have provided personal information of another individual, please ensure that you advise the person about this privacy statement. Our privacy policy is available at ergon.com.au.

Application for Network Connection of an Unmetered Supply Device

Ergon Energy Work Request Number:				
Once completed, please submit this form to Ergon Energy	Email	Fax	Postal	General Enquiries
	customerconnections@ergon.com.au	07 4922 7562	PO BOX 308. Rockhampton Qld 4700	13 74 66

DO YOU HAVE THE RIGHT APPLICATION?

This Application is for:

- ✓ the connection of an unmetered supply device other than pole-mounted devices (e.g. traffic lights, railway crossing lights and alarms, Telstra repeater equipment such as NBN equipment and security cameras)
- ✓ the change of an unmetered supply device

This Application does not apply for:

- ✗ a new connection or connection alteration. For these connections you will need to complete the Network Connection Application Form.
- ✗ a subdivision. For these connections you will need to complete the Network Connection Subdivision/Street Lighting Application Form.
- ✗ street lighting and public lighting. For these connections you will need to complete the Network Connection Subdivision/Street Lighting Application Form.
- ✗ the removal of an unmetered supply device. For these applications you will need to complete a Request for the Abolishment of Supply and Removal of Ergon Energy Electrical Assets Form.
- ✗ an unmetered supply device to be mounted on an Ergon Energy pole such as a CCTV. For these connections you will need to complete a Network Connection of Watchman Lights and Pole-Mounted Unmetered Supply Devices Application Form.
- ✗ a load that exceeds 1500 kVA/1.5 MVA or where power usage is typically above 4 GWh per annum at a single site or generation over 30 kVA. For these connections go to www.ergon.com.au/network/connections/major-business-connections/major-connections.
- ✗ the connection of a Micro Embedded Generating (micro EG) Unit to an existing supply on the Ergon Energy Network. Please complete the Application for Network Connection of a Micro Embedded Generating (micro EG) Unit 30 kVA and Under Form. For these connections go to www.ergon.com.au/network/contractors-and-industry/solar-pv-installers/ies-network-connection-form.

APPLICANT DECLARATION

I understand that this connection application is for the provision of a connection service, being a new connection, or the alteration of an existing connection, to Ergon Energy's network. Please note that our connection offer to you will include itemised connection charges payable by you where relevant.

I acknowledge that if the connection service is not a basic connection service, or if I elect to negotiate the terms of the connection contract (please refer to Ergon Energy's website for details), I will enter into a negotiated connection contract and Ergon Energy will invoice me (the applicant) where relevant, for the costs of processing this connection application and preparing a negotiated connection offer.

I declare that all of the information provided in this connection application is true and correct to the best of my knowledge, and that Ergon Energy will prepare a connection offer based on information contained herein. If I am acting on behalf of a customer, I declare that I have the authority to act on their behalf.

Signed by Applicant: Date: (dd/mm/yy)

Full Name: (please print)

Position: (Company, Business or Government Entity)

IMPORTANT INFORMATION FOR CUSTOMERS:

- I have attached my sketches for my Unmetered Supply application.
- Certain connection services (that is, those that do not require augmentation to Ergon Energy's distribution system) are defined as basic connection services (please refer to Ergon Energy's website for details of these basic connection services and the relevant process). Before a connection service can be classified as a basic connection service, Ergon Energy will need to confirm whether there is available capacity in the relevant area.
- If you believe that your connection service may (subject to confirmation of available capacity) be a **basic connection service**, please select one of the following:
- you are requesting an expedited connection (meaning that if it is a basic connection service, the connection contract will come into effect upon the date your application was received by Ergon Energy) **and** you are happy for this connection contract to be on the terms of the relevant model standing offer (please refer to Ergon Energy's website for details); or
 - you would prefer that Ergon Energy send you a hard copy of the connection offer in the form of the relevant model standing offer for your review, signature and return within 45 business days for the connection contract to come into effect. **This option attracts a fee of \$81.00 (GST inclusive); or**
 - you would prefer to negotiate the terms of the connection contract with Ergon Energy.
- If your connection service is **not a basic connection service**, you will need to negotiate the terms of the connection contract with Ergon Energy.
