1. Amendment Record

Version	Date	Author	Amendments
Initial	14/01/2019	A. Bletchly	Initial Issue

2. Objective

This standard Alert provides notification Schneider Electric is introducing a new front fascia on the RM6 product. This new front fascia is to provide consistency with all the Schneider Electric products (e.g. Premset, SM6, etc...)

3. Introduction

Schneider Electric is introducing a new front fascia on the RM6 product. This change will impact the 22kV Padmount Substation.

4. Detail of Change

This change will start for orders placed to Schneider Electric from 2nd January 2019. As Schneider Electric currently have stock of RM6 in Australia with the current design, there will be a transition period with an expected final transition date of 31st March 2019.

Beside the graphic modifications on the front plate and logo, there is no change to the mechanical and electrical design. The operating procedures also remain the same.
