

# **Jumbun Microgrid - caring for community and Country**

Part of Energy Queensland

## We're building a microgrid to improve the reliability of Jumbun's electricity supply

We're building a low voltage microgrid at Jumbun. The \$3 million project will improve the reliability of the electricity supply for the local Girramay, Jirrbal and Gulnay people in the Jumbun community.

We're helping to care for Country, too. The microgrid will store excess energy in a battery, which can be used when demand is high, meaning a more sustainable energy supply for Jumbun.

Construction of the Jumbun Microgrid is scheduled to commence in late 2025.

We're committed to keeping the Jumbun community and our other stakeholders informed as the project progresses. To find out more about the project, you can register for electronic updates to be sent directly to you. Simply scan the QR code below, or phone our project hotline on 1300 653 055.

Any personal information we collect about you will only be used and disclosed by us in accordance with our Privacy Statement available on our website.

Ergon Energy Network acknowledges the Traditional Custodians of the land on which we live and work, and recognise their continuing connection to land, waters and community. We pay respect to Elders past and present.
