

Approved Point of Attachment List

Part of Energy Queensland

This document provides a list of approved point of attachment RPEQ certified designs for the Ergon Energy Network and Energex Queensland Electricity Connection Manual (QECM) Version 4. The requirements for connection to an overhead point of attachment are set out in the QECM Version 4, section 6. The requirements for connection by an underground point of attachment is outlined in QECM Version 4, Section 7.

All design and manufacturing drawings for steel property poles installed shall have prior RPEQ certification as per clause 6.7.6.3 of the QECM Version 4. The steel property poles listed in this document are approved point of attachment RPEQ certified designs for the Ergon Energy Network and Energex Queensland Electricity Connection Manual (QECM) Version 4.

Ergon Energy Network and Energex welcome the listing of additional point of attachment types including raiser brackets and temporary builders supplies. Suppliers who wish to have a point of attachment approved for use not currently on the approved product list may make a written application to one of the following email addresses:

tech.enquiries@ergon.com.au or tech.enquiries@energex.com.au

Steel Property Poles
